Industrial Milk Company S.A. and its subsidiaries

Condensed Consolidated Interim Financial Statements
For the three months ended 31 March 2014

CONTENTS

Statement of management responsibilities for preparation and approval of condensed consolidated interim financial statements for the three months ended 31 March 2014

Management of the Group of companies "IMC S.A." (Group) is responsible for preparing the condensed consolidated interim financial statements which reflect in all material aspects the financial position of the Group as at 31 March 2014, as well as the results of its activities, cash flows and changes in equity for the three months ended in accordance with International Financial Reporting Standards (IFRS).

In preparing condensed consolidated interim financial statements the Group's Management is responsible for:

- selecting appropriate accounting policies and their consistent application;
- making reasonable measurement and calculation;
- following principles of IFRS or disclosing all considerable deviations from IFRS in the notes to condensed consolidated interim financial statements;
- preparing condensed consolidated interim financial statements of the Group on the going concern basis, except for the cases when such assumption is illegal.
- accounting and disclosing in the condensed consolidated interim financial statements all the relations and transactions between related parties;
- accounting and disclosing in the condensed consolidated interim financial statements all subsequent events that need to be adjusted or disclosed;
- disclosing all claims related to previous or potential legal proceedings;
- disclosing in the condensed consolidated interim financial statements all the loans or guarantees on behalf of the management.

The Group's Management is also responsible for:

- development, implementation and control over effective and reliable internal control system in the Group;
- keeping accounting records in compliance with the legislation and accounting standards of the respective country of the Group's registration;
- taking reasonable steps within its cognizance to safeguard the assets of the Group;
- detecting and preventing from fraud and other irregularities.

These condensed consolidated interim financial statements as at 31 March 2014 prepared in compliance with IFRS are approved on behalf of the Group's Management on 15 May 2014.

On behalf of the Management:

Chief Executive Officer	ALEX LISSITSA	signed
Chief Financial Officer	DMYTRO MARTYNIUK	signed

Consolidated management report

1. Operational and Financial Results

The following table sets forth the Company's results of operations for the 3-month period ended 31 March 2014 and 2013 derived from the Condensed Consolidated Interim Financial Statements:

(in thousand USD)

	Notes	For the three months ended 31 March 2014	31 March 2013	Change in %
CONTINUING OPERATIONS				
Revenue	6	39 878	35 166	13%
Gain (loss) from changes in fair value of biological assets and agricultural produce, net	7	11 314	10 778	5%
Cost of sales	8	(40 537)	(39 080)	4%
GROSS PROFIT		**10 655**	**6 864**	**55%**
Administrative expenses	9	(1 847)	(1 582)	17%
Selling and distribution expenses	10	(3 835)	(1 417)	171%
Other operating income	11	2 780	1 501	85%
Other operating expenses	13	(1 977)	(3 082)	-36%
Write-offs of property, plant and equipment		(71)	(37)	92%
OPERATING PROFIT		**5 705**	**2 247**	**154%**
Financial expenses, net	16	(36 603)	(1 915)	1811%
PROFIT BEFORE TAX FROM CONTINUING OPERATIONS		**(30 898)**	**332**	**-9407%**
Income tax benefit (expenses)	17	(652)	(50)	1204%
NET PROFIT FOR THE PERIOD FROM CONTINUING OPERATIONS		**(31 550)**	**282**	**-11288%**

Normalised EBITDA	**9 287**	**5 059**	84%
Normalised EBIT	**5 777**	**2 284**	153%
Normalised Net profit	**(31 478)**	**319**	-9968%
Depreciation and amortization	(3 510)	(2 775)	26%
Write-offs of property, plant and equipment	(71)	(37)	92%

Normalisation adjustments to EBITDA, EBIT and Net profit exclude effects of non-recurring expenditure from operating segments such as income from the exchange of property certificates and write-offs of property, plant and equipment resulting from an isolated, non-recurring event.

Revenue

The Company's revenue from sales of finished products increased year-on-year by 13% as a consequence of the increase in sales volume (tones) in 1st quarter 2014 due to increase in arable land of the Group.
The following table sets forth the Company's sales revenue by indicated:

(in thousand USD)

	For the three months ended		
	31 March 2014	**31 March 2013**	**Change in %**
Cattle	443	350	27%
Milk	2 400	2 219	8%
Corn	33 670	27 161	24%
Wheat	7	386	-98%
Sunflower	303	43	606%
Soy beans	43	1 612	-97%
Potatoes	1 563	748	109%
Other	1 340	2 077	-35%
	39 769	**34 596**	**15%**

The most significant portion of the Company's revenue comes from selling corn, which represented 84% and 77% of total revenue for the 3-month periods ended 31 March 2014 and 2013, respectively. The following table sets forth the volume of the Company's main crops and revenues generated from the sales of such crops:

(in thousand USD)

	For the three months ended	
	31 March 2014	**31 March 2013**
Corn		
Sales of produced corn *(in tonnes)*	182 974	103 944
Realization price (U.S. $ per ton)	184	261
Revenue from produced corn *(U.S. $ in thousands)*	33 670	27 161
Wheat		
Sales of produced wheat *(in tonnes)*	44	1 979
Realization price (U.S. $ per ton)	161	195
Revenue from produced wheat *(U.S. $ in thousands)*	7	386
Soy beans		
Sales of produced soy beans *(in tonnes)*	117	3 516
Realization price (U.S. $ per ton)	372	459
Revenue from produced soy beans *(U.S. $ in thousands)*	43	1 612
Sunflower		
Sales of produced sunflower *(in tonnes)*	933	82
Realization price (U.S. $ per ton)	325	521
Revenue from produced sunflower *(U.S. $ in thousands)*	303	43
Lupin		
Sales of produced lupin *(in tonnes)*	17	-
Realization price (U.S. $ per ton)	294	-
Revenue from produced lupin *(U.S. $ in thousands)*	5	-
Potatoes		
Sales of produced potatoes *(in tonnes)*	3 767	5 080
Realization price (U.S. $ per ton)	415	147
Revenue from produced potatoes *(U.S. $ in thousands)*	1 563	748
Other (produced only)		
Total sales volume *(in tonnes)*	4 553	2 282
Total revenues *(U.S. $ in thousands)*	1 335	2 077
Total sales volume (in *tonnes)*	**192 405**	**116 883**
Total revenue from sale of crops *(U.S. $ in thousands)*	**36 928**	**32 027**

Revenue relating to sales of corn increased by 24% to USD 33,7 million for the 3-month period ended 31 March 2014 from USD 27,2 million for the 3-month period ended 31 March 2013, due to an increase in sales volume (tones) in 2014.

Cost of sales

The Company's cost of sales increased by 4% to USD 40,5 million for the 3-month period ended 31 March 2014 from USD 39,1 million for the 3-month period ended 31 March 2013. The following table sets forth the principal components of the Company's cost of sales for the periods indicated:

(in thousand USD)

	For the three months ended		
	31 March 2014	**31 March 2013**	**Change in %**
Raw materials	(32 367)	(15 442)	110%
Change in inventories and work-in-progress	110	(13 978)	-101%
Wages and salaries of operating personnel and related charges	(2 199)	(2 810)	-22%
Depreciation and amortization	(3 033)	(2 510)	21%
Third parties' services	(641)	(1 964)	-67%
Fuel and energy supply	(1 647)	(1 831)	-10%
Rent	(382)	(320)	19%
Repairs and maintenance	(179)	(158)	13%
Taxes and other statutory charges	(102)	(62)	65%
Other expenses	(97)	(5)	1847%
	(40 537)	**(39 080)**	**4%**

Raw materials increased by 110% to USD 32,4 million for the 3-month period ended 31 March 2014 from USD 15,4 million for the 3-month period ended 31 March 2013. This increase was due to an increase in sales volume (64,6% of growing year-on-year) and to earlier start of sowing in 2014.

Change in inventories and work-in-progress decreased by 101% to USD 0,1 million of reverse of expenses for the 3-month period ended 31 March 2014 from USD 14,0 million of expenses for the 3-month period ended 31 March 2013. In 2014 due to an earlier start of sowing the decrease in inventories was offset by the increase in work-in-progress.

Gross profit

The Company's gross profit increased to USD 10,7 million for the 3-month period ended 31 March 2014 from USD 6,9 million for the 3-month period ended 31 March 2013 (an 55% year-on-year increase). This increase was due to an increase in revenues.

Administrative expenses

Administrative expenses increased by 17% year-on-year to USD 1,8 million for the 3-month period ended 31 March 2014 from USD 1,6 million for the 3-month period ended 31 March 2013, reflecting an increase in the professional services year-on-year to USD 0,4 million from USD 0,2 million.

Selling and distribution expenses

Selling and distribution expenses increased by 171% year-on-year to USD 3,8 million for the 3-month period ended 31 March 2014 from USD 1,4 million for the 12-month period ended 31 March 2013, reflecting an increase in the volume of realization in 2014.

Other operating income

The Company's other operating income increased by 85% to USD 2,8 million for the 3-month period ended 31 March 2014 from USD 1,5 million for the 3-month period ended 31 March 2013 due to increase in income from subsidized VAT.

Other operating expenses

The Company's other operating expenses decreased by 36% to USD 2,0 million for the 3-month period ended 31 March 2014 from USD 3,1 million for the 3-month period ended 31 March 2013 due to decrease in loss from VAT on export operations as a result of changes in legislation.

Financial expenses, net

The Group's financial expenses, net increased by 1811% to USD 36,6 million for the 3-month period ended 31 March 2014 from USD 1,9 million for the 3-month period ended 31 March 2013.

This increase was due to:

- An increase in interest expenses on loans and borrowings and other financial expenses to th USD 5,2 from th USD 2,5 related to the attraction of new loans – loans and borrowings amounted th USD 154 053 as at 31 March 2014 and th USD 81 582 as at 31 March 2013 (88,8% of increase year to year).
- An increase of non-cash foreign currency exchange loss, net to ths USD 31,7 on the back of the UAH devaluation in 1st quarter 2014. Reporting currency of Ukrainian companies is UAH. According to IFRS requirements loans and borrowings of Ukrainian companies denominated in USD have to be revaluated as of the date of each reporting period using the closing rate. On the back of the UAH devaluation in 1st quarter 2014 as a result of such revaluation of USD loans and borrowings, Ukrainian companies have non-cash foreign currency exchange loss in their financial statements. Further the financial statements of the above mentioned Ukrainian companies are to be consolidated to the Consolidated financial statement of the Group resulting in non-cash foreign currency exchange loss in the Consolidated financial statement of the Group. The nature of this non-cash foreign currency exchange loss is formal (accounting) taking into account that the Group has export revenue denominated in USD which is used on service of loans and borrowings.

Cash flows

The following table sets out a summary of the Company's cash flows for the periods indicated:

(in thousand USD)

	For the three months ended	
	31 March 2014	31 March 2013
Net cash flows from operating activities	(4 927)	996
Net cash flows from investing activities	(25 333)	(2 365)
Net cash flows from financing activities	32 426	937
Net increase in cash and cash equivalents	**2 166**	**(432)**

Net cash flow from operating activities

The Company's net cash outflow from operating activities decreased to USD 4,9 million for the 3-month period ended 31 March 2014 compared to net cash inflow of USD 1,0 million for the 3-month period ended 31 March 2013. The decrease in 2013 was primarily attributable to increase in current biological assets.

Net cash flow from investing activities

The Company's net cash outflow from investing activities increased to USD 25,3 million for the 3-month period ended 31 March 2014 compared to net cash outflow of USD 2,4 million for the 3-month period ended 31 March 2013. The increase in 2014 was primarily attributable to repayments of payables for investment (acquisition of subsidiaries).

Net cash flow from financing activities

Net cash inflow from financing activities increased to USD 32,4 million for the 3-month period ended 31 March 2014 from a net cash inflow of USD 0,9 million for the 3-month period ended 31 March 2013. The increase in 2014 was due to increase in proceeds from long-term and short-term borrowings.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

1. Description of formation and business.

Industrial Milk Company S.A. (the "Parent company") is a limited liability company registered under the laws of Luxembourg on 28 December 2010 for an unlimited period of time. Industrial Milk Company S.A. was formed to serve as the ultimate holding company of Unigrain Holding Limited and its subsidiaries. The registered address of Industrial Milk Company S.A. is L-2540, 26-28 rue Edward Steichen, Luxembourg, Grand Duchy Luxembourg, its register number within the Registre de Commerce et des Sociétés du Luxembourg is RCS Lu B157843.

IMC and its subsidiaries (the "Group" or the "IMC") is an integrated agricultural company in Ukraine. The main areas of Group's activities are:

- cultivation of grain & oilseeds crops, potato production;
- dairy farming;
- storage and processing of grain & oilseeds crops.

The Group is among Ukraine's top-10 industrial milk producers. The grain and oilseeds crops produced by the Group are sold on both the Ukrainian and export markets.

Until December 2010 there was no the holding company of the Group.

In June 2009 in the course of the corporate reorganization Unigrain Holding Limited was established as a sub-holding company of the Group. Through the series of transactions Unigrain Holding Limited became the immediate parent of Burat-Agro, Ltd., Burat, Ltd., Chernihiv Industrial Milk Company, Ltd., CJSC Mlibor, OJSC Poltava Kombilormoviy Zavod and Zemelniy Kadastroviy Centr SA.

In December 2010 Industrial Milk Company S.A. was registered as a holding company of the Group through the ownership of 100% of the voting shares in the company Unigrain Holding Limited.

In June 2011 Unigrain Holding Limited acquired 100% of the voting shares in the company PAE Promin, PE Progress 2010, PAE Slavutich. In November 2011 companies PAE Slavutich and PE Progress 2010 were merged to Chernihiv Industrial Milk Company, Ltd and the company PAE Promin was merged to Burat-Agro, Ltd.

In August 2011 trading company Aristo Eurotrading was formed.

In December 2011 Unigrain Holding Limited acquired 100% of the voting shares in the company AF Kalynivska 2005, Ltd, AF Govtneva, Ltd, AF Shid 2005, Ltd, APP Virynske, Ltd, Pisky, Ltd., SE "Viry-Agro" and 80,61% of the voting shares in the company OJSC "Viryvske HPP".

In March 2012 Unigrain Holding Limited acquired 100% of the voting shares in the company Ukragrosouz KSM, Ltd.

In June 2012 Unigrain Holding Limited acquired 100% of the voting shares in the company PAC Slobozhanschina Agro.

In November 2012 the Group was restructured and 6 companies were joined to PAC Slobozhanschina Agro: AF Kalynivska-2005 Ltd, AF Govtneva Ltd, AF Shid-2005 Ltd, AIE Vyrynske Ltd, Pisky Ltd, SE "Vyry-Agro".

In December 2012 Unigrain Holding Limited acquired 100% of the voting shares in the company Bluerice Limited. The following companies became the part of the Group, as their owner is Bluerice Limited: Agroprogress Holding Ltd, Agroprogress PE, Bobrovitsky Hlebzavod Ltd, Plemzavod Noviy Trostyanets Ltd, PJSC " Bobrovitske HPP", Losinovka-Agro Ltd, Parafiyivka-Progress Ltd, Nosovsky Saharny Zavod Ltd.

In November 2013 trading company Negoce Agricole S.A. was formed.

In December 2013 Losinovka-Agro Ltd was joined to Agroprogress PE (noted * in the column Cumulative ownership ratio, % as at 31 December 2013).

During the year 2013 the Group acquired the voting shares in the company AgroKIM Ltd and on 30 December 2013 the acquisition was completed and 100% of the voting shares owned by the Group.

The principal activities of the companies comprising the Group are as follows:

Operating entity	Principal activity	Country of registration	Year established /acquired	Cumulative ownership ratio, %	
				31 March 2014	31 March 2013
Industrial Milk Company S.A.	Holding company	Luxembourg	28.12.2010	100,00	100,00

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

Today IMC is the vertically integrated and high-technology group of companies operating in Sumy, Poltava and Chernihiv region (northern and central Ukraine).

The Group controls 140,4 thousand ha (136,6 thousand ha under processing of high quality arable land). As at 31 March 2014 the Group operates in three segments: crop farming, dairy and beef farming and grain and oilseed storage.

IMC is strategically focused on the development of its crop operations due to high gross marginality in the segment. The Group plans to increase cultivated land from its current 136,6 thousand ha to 285 thousand ha in 2019.

The financial year of the Group begins on 1 January of each year and terminates on 31 December of each year.

The Group's condensed consolidated interim financial statements are public and available for consultation at:
http://imcagro.com.ua/index.php/uk/dlya-investoriv/regulatory-filings/financial-reports or at its registered office.

2. Basis of preparation of the condensed consolidated interim financial statements

Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and as adopted by the European Union. These condensed consolidated interim financial statements are based on principal accounting policies and critical accounting estimates and judgments that are set out below. These accounting policies and assumptions have been applied consistently to all periods presented in these condensed consolidated interim financial statements.

Companies comprising the Group which are incorporated in Ukraine maintain their accounting records in accordance with Ukrainian regulations. Ukrainian statutory accounting principles and procedures differ from those generally accepted under IFRS. Accordingly, the condensed consolidated interim financial statements, which have been prepared from the Ukrainian statutory accounting records for the entities of the Group domiciled in Ukraine, reflect adjustments necessary for such financial statements to be presented in accordance with IFRS.

In preparation of these condensed consolidated interim financial statements the management used their best knowledge of International Financial Reporting Standards and interpretations, facts and circumstances that can affect these condensed consolidated interim financial statements.

Going concern

These condensed consolidated interim financial statements have been prepared on a going concern basis, which contemplates the disposal of assets and the settlement of liabilities in the normal course of business. The recoverability of Group's assets, as well as the future operations of the Group, may be significantly affected by the current and future economic environment. Management believes that Group has reliable access to sources of financing capable to support appropriate operating activity of Group entities. These condensed consolidated interim financial statements do not include any adjustments should the Group be unable to continue as going concern.

Basis of measurement

The condensed consolidated interim financial statements are prepared under historical cost basis except for the revalued amounts of property, plant and equipment, biological assets and agricultural produce.

The Group's management has decided to present and measure these condensed consolidated interim financial statements in United States Dollars ("USD") for the purposes of convenience of users of these financial statements.

Use of estimates

The preparation of these condensed consolidated interim financial statements involves the use of reasonable accounting estimates and requires the management to make judgments in applying the Group's accounting policies. These estimates and assumptions are based on management's best knowledge of current events, historical experience and other factors that are believed to be reasonable. Note 4 contains areas, related to a high degree of importance or complexity in decision-making, or areas where assumptions and estimates are important for amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities at the end of the reporting period.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

Foreign currency translation

Functional and presentation currency

Items included in the financial statements of each of the Group's companies are measured using the currency of the primary economic environment in which the company operates ("the functional currency"). For the companies of the Group operating in Ukraine the Ukrainian Hryvna ("UAH") is the functional currency. For the companies operating in Cyprus and Luxembourg the functional currency is Euro ("EUR").

These condensed consolidated interim financial statements are presented in the thousand of United States Dollars ("USD"), unless otherwise indicated.

Foreign currency transactions and balances

Transactions in foreign currencies are initially recorded by the Group entities at their respective functional currency rates prevailing at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency spot rate of exchange ruling at the reporting date. All exchange differences are taken to the statement of comprehensive income with the exception of all monetary items that provide an effective hedge for a net investment in a foreign operation. These are recognised in other comprehensive income until the disposal of the net investment, at which time they are recognised in the statement of comprehensive income. Tax charges and credits attributable to exchange differences on those monetary items are also recorded in equity.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

The principal exchange rates used in the preparation of these condensed consolidated interim financial statements are as follows:

Currency	31 March 2014	Average for the 3 months ended 31 March 2014	31 December 2013	31 March 2013	Average for the 3 months ended 31 March 2013	31 December 2012
UAH/ USD	10,9546	8,8627	7,9930	7,9930	7,9930	7,9930

Translation into presentation currency

The results and financial position of all the Group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the official rate at the date of the balance sheet;

- income and expenses are translated at average exchange rate for the period, unless fluctuations in exchange rates during that period are significant, in which case income and expenses are translated at the rate on the dates of the transactions;

- all the equity and provision items are translated at the rate on the dates of the transactions;

- all resulting exchange differences are recognized as a separate component of other comprehensive income;

- in the condensed consolidated interim statement of cash flows cash balances at the beginning and end of each presented period are translated at rates prevailing at corresponding dates. All cash flows are translated at average exchange rates for the periods presented. Exchange differences arising from the translation are presented as the effect of translation into presentation currency.

Principles of consolidation

Subsidiaries

Subsidiaries are all entities over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

The acquisition method of accounting is used to account for the acquisition of subsidiaries. The cost of an acquisition is measured at the fair value of the assets given up, equity instruments issued and liabilities incurred or assumed at the date of acquisition, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the statement of comprehensive income.

Inter-company transactions, balances and unrealized gains on transactions between Group companies are eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Financial statements of parent company and its subsidiaries, which are used while preparing the condensed consolidated interim financial statements, should be prepared as at the same date on the basis of consistent application of accounting policy for all companies of the Group.

3. Summary of significant accounting policies

Property, plant and equipment

Property, plant and equipment are stated at their revalued amounts that are the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Any accumulated depreciation at the date of revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

If there is no data about the market value of property, plant and equipment due to the nature of highly specialized machinery and equipment, such objects are evaluated according to acquisition expenses under present-day conditions, adjusted by an ageing percentage.

Property, plant and equipment of acquired subsidiaries are initially recognised at their fair value which is based on valuations performed by independent professionally appraisers.

Valuations are performed frequently enough to ensure that the fair value of a remeasured asset does not differ materially from its carrying amount as at reporting date.

Increases in the carrying amount arising on revaluation of property, plant and equipment are recognised in other comprehensive income and accumulated in equity under the line Revaluation reserve. Decreases in the carrying amount as a result of a revaluation are in profit or loss. However, the increase is recognised in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit or loss. Decrease related to previous increase of the same asset is recognized against other reserves directly in equity.

The revaluation surplus included in equity in respect of an item of property, plant and equipment is transferred directly to retained earnings as the asset is used by an entity (in the amount that is the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost) and when the asset is derecognized (in the full amount).

Subsequent major costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that these replacements will materially extend the life of property, plant and equipment or result in future economic benefits. The carrying amount of the replaced part is derecognized. All other day-to-day repairs and maintenance are charged to the statement of comprehensive income during the financial period in which they are incurred.

Property, plant and equipment or their essential component are written-off in a case of their disposal or if future economic benefits from use or disposal of such asset are not expected. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included to the other incomes (expenses) in the statement of comprehensive income when the asset is derecognized.

Depreciation of an asset begins when it is available for use, ie, when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation of an asset ceases when the asset is derecognized. Depreciation does not cease when the asset becomes idle or is retired from active use and held for disposal unless the asset is fully depreciated.

Depreciation on assets is calculated using the straight-line method to allocate their revalued amounts to their residual values over their estimated useful lives, as follows:

- Buildings	15-35 years
- Machinery	5-15 years
- Motor vehicles	5-15 years
- Other assets	5-10 years

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

The assets' residual values and useful lives are reviewed and adjusted, if appropriate, at each balance sheet date.

Land is not depreciated.

Construction in progress comprises costs directly related to the construction of property, plant and equipment, as well as the relevant variable and fixed overhead costs related to the construction. These assets are depreciated from the moment when they are ready for operation.

Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of comprehensive income in other income (expenses) when the asset is derecognized.

The Group determines whether the useful life of an intangible asset is finite or indefinite.

Useful life of intangible assets is indefinite if the Group suggests that the period during which it is expected that the object of intangible assets will generate net cash inflows to the organization has no foreseeable limit. Intangible assets with indefinite useful lives are not amortized, but reviewed for impairment.

Amortisation of intangible assets is charged to the statement of comprehensive income on a straight-line basis over the estimated useful lives of intangible assets from the date they are available for use. The following estimated useful lives, which are re-assessed annually, have been determined for classes of finite-lived intangible assets:

- Land lease rights 5-15 years
- Computer software 5 years

Impairment of property, plant and equipment and intangible assets

The carrying amounts of property, plant and equipment and intangible assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated in order to determine the extent of the impairment loss, if any. Where it is impossible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of a cash-generating unit to which the asset belongs.

The recoverable amount is the higher of the fair value of an asset less costs to sell and its value in use. Value in use is the net present value of expected future cash flows, discounted on a pre-tax basis, using a rate that reflects current market assessments of the time value of money.

An impairment loss is recognized whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognized in the statement of comprehensive income.

A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of comprehensive income unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase.

Biological assets

The biological assets are classified as non-current and current depending on the expected pattern of consumption of the economic benefits embodied in the biological assets.

The following categories of biological assets are distinguished by the Group:

- Non-current biological assets of plant-breeding at fair value;
- Non-current biological assets of cattle-breeding at fair value;
- Current biological assets of plant-breeding measured at fair value;
- Current biological assets of cattle-breeding measured at fair value.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

The Group assesses a biological asset at initial recognition and at each balance sheet date at fair value less estimated point-of-sale costs, except for the cases where the fair value cannot be determined with reasonable assurance.

Gains or losses from movements in the fair value of biological assets less estimated selling and distribution expenses of the Group are recorded in the period they incurred in the statement of comprehensive income as Gain (loss) from changes in fair value of biological assets and agricultural produce, net.

The Group capitalizes expenses between the reporting dates into the cost of biological assets.

- Biological assets of plant-breeding

  The capitalized expenses include all the direct costs and overhead costs related to the farming division. Such costs may include the following costs: raw materials (seeds, mineral fertilizers, fuel and other materials), wages and salaries expenses of production personnel and related charges, amortization and depreciation, land lease expenses and other taxes, third parties' services and other expenses related to the cultivation and harvesting of biological assets of plant-breeding.

- Biological assets of animal-breeding

  The capitalized expenses include all the direct costs and overhead costs related to the live-stock breeding. The types of costs that are capitalized in the current biological assets of animal breeding are the following: fodder, means of protection of animals and artificial insemination, fuel and other materials, wages and salaries expenses of production personnel and related charges, amortization and depreciation, third parties' services and other expenses related to the current biological assets of animal breeding.

All expenses related to the non-current biological assets of cattle breeding are included into the cost of milk. Respectively the note 20 of non-current biological assets does not include any capitalized costs.

The expenses on works connected with preparation of the lands for future harvest are included in to the Inventories as work-in-progress. After works on seeding on these lands the cost of field preparation is reclassified as biological assets held at fair value.

Agricultural produce

The Group classifies the harvested product of the biological assests as agricultural produce. Agricultural produce is measured at its fair value less costs to sell at the point of harvest. The difference between the cost and fair value less costs to sell at the point of harvest of harvested agricultural produce is recognized in the statement of comprehensive income as Gain (loss) from changes in fair value of biological assets and agricultural produce, net.

After the initial recognising as at the date of harvesting agricultural produce is treated as inventories. Agricultural produce measurement as at the date of harvest becomes inventories' cost to account.

Inventories

Inventories are measured at the lower of cost or net realizable value.

The cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of agriculture produce is its fair value less costs to sell at the point of harvesting.

The cost of work in progress and finished goods includes costs of direct materials and labor and other direct productions costs and related production overheads (based on normal operating capacity). Costs are capitalized in work in progress for preparing and treating land prior to seeding in the next period. Work in progress is transferred to biological assets once the land is seeded.

The cost of inventories is assigned by using FIFO method.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

The Group periodically analyses inventories to determine whether they are damaged, obsolete or slow-moving or if their net realizable value has declined, and makes an allowance for such inventories. If such situation occurred, the sum remissive the cost of inventories should be reflected as a part of other expenses in statement of comprehensive income.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

Financial assets

The Group's financial assets include cash and cash equivalents, trade and other accounts receivable, other receivables.

Management determines the classification of financial assets at initial recognition and re-evaluates this designation at every balance sheet date. Financial assets are classified in the following category at the time of initial recognition based on the purpose for which the financial assets were acquired:

- "Loans and receivables" that are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. This category includes lendings given that appeared owing to issuance of means to debtor. Receivables include trade and other accounts receivables.

Financial assets are recognized initially at fair value plus directly attributable transaction costs.

The category of financial assets "Loans and receivables" are subsequently measured as follows:

- Receivables are measured at amortized cost using the effective interest method, less allowance for impairment.
- Borrowings issued are measured at amortized cost less impairment losses.

Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or where the Group has transferred substantially all risks and rewards of ownership.

Financial assets of the Group are assessed for indications of impairment at each reporting date. A financial asset is deemed to be impaired if there is objective evidence indicating that a loss event has occurred after initial recognition of the financial asset, and that the loss event has a negative effect on the estimated future cash flows of the financial asset that can be reliably estimated.

For "Loans and receivables" the amount of impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. For trade and other receivables the carrying amount is reduced through the use of an allowance account and for borrowings the carrying amount is reduced directly by the impairment loss. If there is objective evidence that the Group is not able to collect all amounts due to the original terms of the receivables, the allowance for impairment is established. When a receivable is determined to be uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Forming of the allowance account is recognized in statement of comprehensive income as other operating expenses.

Prepayments and other non-financial assets

Prepayments are reflected at nominal value less VAT and accumulated impairment losses, other non-financial assets are reflected at nominal value less accumulated impairment losses.

Prepayment are classified as non-current assets when the goods or services relating to the prepayment are expected to be obtained after one year, or when the prepayment relates to an asset which will itself be classified as non-current upon initial recognition.

If there is an indication that the assets, goods or services relating to a prepayment will not be received, the carrying value of the prepayment is written down accordingly and a corresponding impairment loss is recognised as a part of other expenses in statement of comprehensive income.

Cash and cash equivalents

Cash and cash equivalents include cash in bank and cash in hand, call deposits, other short-term highly liquid investments with original maturities of three months or less.

Financial liabilities

The Group's financial liabilities include trade and other payables, loans and borrowings.

Financial liabilities are recognized initially at fair value minus directly attributable transaction costs.

The Group classifies its financial liabilities as subsequently measured at amortized cost using the effective interest method.

Any difference between amount of received resources and sum to repayment is recorded as interest expenses in statement of comprehensive income at effective interest rate method during the period, when borrowings were received.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the income statement.

Leases

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date: whether fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

- Group as a lessee
  Leases, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are classified as finance leases. Assets held under finance lease are included in property, plant and equipment since the commencement of lease at the lower of the fair value of leased property and present value of minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized in the statement of comprehensive income.
  Leased assets are depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.
  Operating lease payments are recognized as an expense in the statement of comprehensive income on a straight line basis over the lease term.
- Group as a lessor
  Leases where the Group does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same bases as rental income. Contingent rents are recognised as revenue in the statement of comprehensive income in the period in which they are earned. Costs, including depreciation, incurred in earning the lease income are recognized as an expense.

Government grants

The Ukrainian legislation provides various tax benefits and grants for companies engaged in agriculture. Such benefits and grants are approved by the Supreme Council of Ukraine, the Ministry of Agrarian Policy, Ministry of Finance and local authorities.

- Government grants related to plant-breeding
  Amount of such benefit is determined based on the number of hectares planted for the future harvest, taking into account the crop expected to be bred. The Group of companies recognizes this type of benefits upon the receipt of funds as other operating income in the statement of comprehensive income.
- Government grants related to cattle-breeding
  Agricultural producers of poultry and livestock are eligible for government grants, depending on quantity of meat in live weight delivered to processing enterprises. The Group of companies recognizes these grants upon entitlement to them as other operating income.
  Agricultural producers of poultry and livestock are also eligible for government grants for each animal unit of poultry and livestock, including slaughter for own needs or transfer to slaughter. The Group recognizes these grants upon the receipt of funds due to the uncertainty in amounts and timeframes of receipt.
- Government grants related to VAT
  According to the Ukrainian tax legislation, the agricultural enterprises (whose income from sale of agricultural products is not less than 75% of the total gross income, or enterprises which sell meat and milk products irrespective of the volume of such transactions) receive benefits regarding VAT payment on agricultural operations. Correspondingly above, VAT amounts payable are not transferred into the budget by the entities, but credited to the entity's separate special account to support the agriculture; the amount of tax credit is used as a reduction in tax liabilities of the next period. As a result of these operations tax amounts are recognized in the statements of comprehensive income as other operating income.
  Management of the Group is confident that confirmed by tax declaration as at the end of the month VAT payable should be recognized as other operating income in current month although it will be credited to the entity's separate special account next month.

Taxation

- Income tax

  Income tax expense represents the amount of the tax currently payable and deferred tax.

  Income tax expenses are recorded as expenses or income in the condensed consolidated interim statement of comprehensive income, except when they relate to items directly attributable to other comprehensive income (in which case the amount of tax is taken to other comprehensive income), or when they arise at initial recognition of company acquisition.

  i. Current income tax

     Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, by the reporting date, in the countries where the Group operates and generates taxable income.

  ii. Deferred income tax

     Deferred tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

     Deferred tax liabilities are recognized for all taxable temporary differences, except:

     - where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;

     - in respect of taxable temporary differences associated with investments in subsidiaries, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

     Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized except:

     - where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;

     - in respect of deductible temporary differences associated with investments in subsidiaries, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

     The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

     Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

     Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

- Fixed agricultural tax

  According to effective legislation, the Ukrainian consolidated companies of the Group involved in production, processing and sale of agricultural products may opt for paying fixed agricultural tax (FAT) in lieu of income tax, land tax and some other local taxes if the revenues from sale of their own agricultural products constitute not less than 75% of their total (gross) revenues. The FAT is assessed at 0,15% on the deemed value of the land plots owned or leased by the entity (as determined by the relevant State authorities). As at 31 March 2014, 7 of the companies comprising the Group were elected to pay FAT (2013: 8).

- Value added tax (VAT)

  VAT output equals to the total amount of VAT collected within a reporting period, and arises on the earlier of the date of shipping goods to a customer or the date of receiving payment from the customer. VAT input is the amount that a taxpayer is entitled to offset against his VAT liability in a reporting period. Rights to VAT input arise on the earlier of the date of payment to the supplier or the date goods are received.

  Revenue, expenses and assets are recognized less VAT amount, except cases, when VAT arising on purchases of assets or services, is not recoverable by tax authority; in this case VAT is recognized as part of purchase costs or part of item of expenses respectively. Net amount of VAT, recoverable by tax authority or paid, is included into accounts receivable and payable, reflected in condensed consolidated interim statement of financial position.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

- Other taxes payable
  Other taxes payable comprise liabilities for taxes other than above, accrued in accordance with legislation enacted or substantively enacted by the end of the reporting period.

Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Contingent assets and liabilities

Contingent liabilities are not recognized in the financial statements. The Group discloses information about contingent liabilities in the Notes to financial statements, except in cases where fulfillment of contingent liabilities is unlikely; because of the remoteness of the event (possible repayment period is more than 12 months).

The Group constantly analyzes contingent liabilities to determine the possibility of their repayment. If the repayment of a liability, which was previously characterized as contingent, becomes probable, the Group records the provision for the period in which repayment of the obligation has become probable.

Contingent assets are not recognized in the financial statements, but disclosed in the Notes where there is a reasonable possibility of future economic benefits.

Share capital

Ordinary shares issued are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction. Any excess of the fair value of consideration received over the par value of shares issued is presented in financial statements as Share premium.

Dividends

Dividends are recognized as a liability and deducted from shareholders' equity at the balance sheet date only if they are declared before or on the balance sheet date. Dividends are disclosed when they are proposed before the balance sheet date or proposed or declared after the balance sheet date but before the condensed consolidated interim financial statements are authorized for issue.

Earnings per share

Earnings per share are determined by dividing the net profit or loss attributable to the owners of parent company by the weighted average number of shares outstanding during the reporting period.

Revenue recognition

The Group recognizes revenue when the amount of revenue can be reliably measured and it is probable that future economic benefits will flow to the Group.

Revenue is measured at fair value of consideration amount received or receivable for the sale of goods and services in the ordinary course of the Group's business activities. Revenue is recorded excluding taxes and duties on sales, discounts and returns.

- Sales of goods
  Revenue from sales of goods is recognised at the point of transfer of risks and rewards of ownership of the goods, normally when the goods are shipped. If the Group agrees to transport goods to a specified location, revenue is recognised when the goods are passed to the customer at the destination point. The Group uses standardised INCOTERMS which define the point of risks and reward transfers.
- Rendering of services
  Revenue from rendering services is recognized on the basis of the stage of work completion under each contract. When financial result can be measured reliably, revenue is recognized only to the extent of the amount of incurred charges, which can be recovered.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

Income from the exchange of property certificates

When the items of property, plant and equipment are acquired in exchange for non-cash asset (property certificate), the initial value of such assets is estimated at fair value. The difference between the price paid for property certificates and the fair value of received items of property, plant and equipment is recognized as income in the period of the exchange operation.

Borrowing costs

Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. Investment income resulting from temporary investment of received borrowing costs, until their expensing for the purchase of capital construction objects, shall be deducted from the cost of raising borrowing costs that may be capitalized.

All other borrowing costs are expensed in the period they occur.

4. Critical accounting estimates and judgments

The preparation of the Group's condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities and the disclosure of contingent assets and liabilities at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

Used estimates and assumptions are reviewed by the management of the Group on a continuous basis, by reference to past experiences, current trends and all available information that is relevant at the time of preparation of financial statements. Adjustments to accounting estimates are recognized in the period in which the estimate is revised if the change affects only that period or in the period of the revision and subsequent periods, if both periods are affected.

In the process of applying the Group's accounting policies, management has made the following judgments, estimates and assumptions which have the most significant effect on the amounts reflected in the condensed consolidated interim financial statements:

Fair value of property, plant and equipment

The Group engages an independent appraiser to determine the fair value of property, plant and equipment on a regular basis.

The assessment is conducted in accordance with International Valuation Standards for property. The assessment procedure is carried out for all groups of property, plant and equipment. The fair value of items of property, plant and equipment is estimated on the basis of comparative and cost plus approaches.

The comparative approach is based on an analysis of sales prices and offers of similar items of property, plant and equipment, taking into account the appropriate adjustments for differences between the objects of comparison and assessment item. Based on the application of this approach, the fair value of property, plant and equipment is determined on the basis of their market value.

The cost approach involves the definition of present value of costs of reconstruction or replacement of the assessment item with their further adjustment by the depreciation (impairment) amount. Based on the application of this approach, the fair value of certain items of property, plant and equipment is determined in the amount of the replacement of these items. The cost plus method is adjusted by the income method data, which is based on the discounted cash flow model. This model is most sensitive to the discount rate, as well as to the expected cash flows and growth rates used for the extrapolation purposes. Judgments of the Group in determining the indices used in the appraisers' calculations may have a significant effect on the determination of fair value of property, plant and equipment, and hence on their carrying amount.

The fair value of property, plant and equipment of all the Group's companies has been measured as at 31 December 2010 by an independent appraiser FDI "Bureau Veritas Ukraine" (note 16).

Useful lives of property, plant and equipment

Items of property, plant and equipment owned by the Group are depreciated using the straight-line method over their useful lives, which are calculated in accordance with business plans and operating calculations of the Group's management with respect to those assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

The estimated useful life and residual value of non-current assets are influenced by the rate of exploitation of assets, servicing technologies, changes in legislation, unforeseen operational circumstances. The Group's management periodically reviews the applicable useful lives. This analysis is based on the current technical condition of assets and the expected period in which they will generate economic benefits to the Group.

Any of the above factors may affect the future rates of depreciation, as well as carrying and residual value of property, plant and equipment.

There were not any changes in accounting estimates of remaining useful liver of items of property, plant and equipment in 1st quarter 2014.

Impairment of property, plant and equipment and intangible assets

The Group carries out revaluations on a regular basis and conducts a full valuation exercise if there is an indication of impairment. An impairment review is conducted at the balance sheet date. To test property, plant and equipment and intangible assets for impairment, the Group's business is treated as three cash generating units: farming division, live-stock breeding and storage and processing. The recoverable amount of the cash-generating unit is determined on the basis of value in use. The amount of value in use for the cash generating unit is determined on the basis of the most recent budget estimates prepared by management and application of the income approach of valuation.

As at 31 March 2014 and 2013 impairment of property, plant and equipment and intangible assets was not identified (note 16).

Fair value of acquisition of subsidiaries

The Group engages an independent appraiser to determine the fair value of identifiable assets acquired and liabilities assumed at the acquisition date. Acquisitions often result in significant intangible benefits for the Group, some of which qualify for recognition as intangible assets. Significant judgement is required in the assessment and valuation of these intangible assets, often with reference to internal data and models.

The estimation of fair value of assets and liabilities is based upon quoted market prices and widely accepted valuation techniques, including discounted cash flows and market multiple analyses. Such estimates include assumptions about inputs to our discounted cash flow calculations, industry economic factors and business strategies.

Fair value of biological assets

Due to an absence of an active market for non-current biological assets for cattle-breeding and biological assets of plants-breeding in Ukraine, to determine the fair value of these biological assets, the Group used the discounted value of net cash flows expected from assets as at reporting date. Fair value is determined based on market prices and a current market-determinated pre-tax rate as at the date of valuation.

The fair value of current biological assets of cattle-breeding is measured using market prices as at reporting date. The fair value is determined based on market prices of livestock of similar age, breed and genetic merit.

The income from recognition of biological assets at fair value for the three months ended 31 March 2014 amounted to th USD 11 314 (note 6).

Fair value of agricultural produce

The Group estimates the fair value of agricultural produce at the date of harvesting using the current quoted prices in an active market. Costs to sell at the point of harvest are estimated based on expected future selling costs that depend on conditions of sales agreements. The fair value less costs to sell becomes the carrying value of inventories at the date of harvesting.

Inventories

As at the reporting date the Group assesses the need to reduce the carrying amount of inventories to their net realizable value. The measurement of impairment is based on the analysis of market prices for similar inventories existing at the reporting date and published in official sources. Such assessments can have a significant impact on the carrying amount of inventories.

Besides, at each balance sheet date, the Group assesses inventories for surplus and obsolescence and determines the allowance for obsolete and slow moving inventories. Changes in assessment can influence the amount of required allowance for obsolete and slow moving inventories either positively or negatively.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

At the reporting date the item Work-in-progress includes investments in the future harvest. The cost of these investments is based on expenses incurred during the current year. Investment valuation model includes a number of judgments of management about the benefits to be extracted from the utilization of such investments in the future. Management's estimates of the value of investments based on the recommendations of scientific sources and agronomic calculations of the internal services of the Group.

As at 31 March 2014 and 2013 there was no the inparment of inventories.

Fair value of financial instruments

The fair value of financial assets and liabilities is determined by applying various valuation methodologies. Management uses its judgment to make assumptions based on market conditions existing at each balance sheet date. Where the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, they are determined using valuation techniques including the discounted cash flows model. Management uses discounted cash flow analysis for various loans and receivables as well as debt instruments that are not traded in active markets. The effective interest rate is determined by reference to the interest rates of instruments available to the Group in active markets. In the absence of such instruments, the effective interest rate is determined by reference to the interest rates of active market instruments available adjusted for the Group's specific risk premium estimated by management.

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible to the Group.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Impairment of trade and other accounts receivable

Management evaluates the recoverability of trade and other accounts receivable by estimating the likelihood of its collection. These estimations are based on an analysis of individual accounts. The amount of impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Management estimates the future cash flow by taking into consideration the following: analysis of trade and other accounts receivable in accordance with the contractual credit terms allowed to customers; the collection history of customers; the general economic conditions, the specifics of industry and the financial position of customers.

As at 31 March 2014 allowances for accounts receivable were recognized in the amount of th USD 79 (note 25).

Impairment of other financial and non-financial assets

Management assesses whether there are any indicators of possible impairment of other financial and non-financial assets at each reporting date. If any events or changes in circumstances indicate that the current value of the assets may not be recoverable or the assets, goods or services relating to a prepayment will not be received, the Group estimates the recoverable amount of assets. If there is objective evidence that the Group is not able to collect all amounts due to the original terms of the agreement, the corresponding amount of the asset is reduced directly by the impairment loss in the statement of comprehensive income. Subsequent and unforeseen changes in assumptions and estimates used in testing for impairment may lead to the result different from the one presented in the financial statements.

As at 31 March 2014 allowances for other financial and non-financial assets were recognized in the amount of th USD 50 (note 25).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

Long-term VAT recoverable

The Group classifies the VAT recoverable balance as current or non-current based on expectations as to whether it will be realised within 12 months from the reporting date. In making this assessment, management considered past history of receiving VAT refunds from the State budget. For VAT recoverable expected to be set off against VAT liabilities in future periods, management based its estimates on detailed projections of expected excess of VAT output over VAT input in the normal course of the business.

As at 31 March 2014 the part of VAT recoverable in the amount of th USD 862 was classified as long-term VAT recoverable (note 20).

Taxation

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded.

The Group establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it operates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority.

Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective Group company's domicile.

Deferred tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Since 01 January 2011 a new Tax Code of Ukraine has been adopted. Tax Code regulates relationships evolving in process of adoption, altering and cancellation of taxes and charges in Ukraine; it specifies full list of taxes and charges collected in Ukraine, administration procedure for taxes, payers of taxes and charges, their rights and obligations, power of controlling authorities, credentials and responsibilities of their officials in the exercise of tax control, and also liability for the infringement of tax law.

Adoption of the Tax Code changes taxation system in Ukraine entirely. Quantity of taxes decreases almost twofold. Gradual decrease of base rates for all fiscal charges is stipulated within several years. Additional rate for tax on income of physical persons is adopted. Regulations settling procedure of taxation covered by the Tax Code are cancelled. These changes substantially increase risks of incorrect interpretation of adopted Tax Code. As a result of future tax inspections additional liabilities may be revealed, which will not comply with tax statements of the Company. Such liabilities may comprise taxes themselves, and also fines and penalties, and their amounts may be material.

Starting from 1 September 2013, Ukrainian legislation implemented new transfer pricing rules. These rules introduce additional reporting and documentation requirements to transactions with related parties. In accordance with the new rules, the tax authorities obtain additional tools with the help of which they may claim that prices or profitability in transactions with related parties different from arm's length transactions. As the practice of implementation of the new transfer pricing rules has not yet developed and the wording of some clauses of the rules is unclear, the probability that the Group's transfer pricing positions may be challenged by the tax authorities cannot be reliably estimated as of the date of authorization of these condensed consolidated interim financial statements for issue.

Management is confident that the Group complies with all transfer pricing rules.

Legal proceedings

The Group's management makes significant assumptions in estimation and reflection of the risk of exposure to contingent liabilities related to current legal proceedings and other unliquidated claims, as well as other contingent liabilities. Management's judgments are required in assessing the possibility of a secured claim against the Group or material obligations, as well as in determining probable amounts of final payment or obligations. Due to the uncertainties inherent in the evaluation process, actual expenses may differ from the initial calculations.

These preliminary estimates are subject to changes as new information becomes available from the Group's internal specialists, if any, or from third parties, such as lawyers. Revisions of such estimates may have a significant impact on future operating results.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(in thousand USD, unless otherwise stated)

New and amended standards and interpretations

New IFRS standarts and interpretations applicable from 2014 onward:

The following Standards, Amendments to Standards and Interpretations have been issued but are not yet effective for annual periods beginning on 1 January 2013. Those which may be relevant to the Group are set out below. The Group does not plan to adopt these Standards early.
Standards and Interpretations adopted by the EU:

- IFRS 7 (Amendments) “Financial instruments: Disclosures” – Disclosures about the initial application of IFRS 9 (effective for annual periods beginning on or after 1 January 2015)
- IFRS 9 “Financial Instruments: Classification and Measurement and Accounting for financial liabilities and derecognition”1 (effective for annual periods beginning on or after 1 January 2015)

In 2011 Industrial Milk Company S.A. completed initial public offering of own shares on Warsaw Stock Exchange. Issue of share capital of Industrial Milk Company S.A. brought to the increase of share capital equaling to th USD 10 and share premium in amount of th USD 24 387.

Revaluation reserve

The fair value of Group's property, plant and equipment has been measured as at 31 December 2009 and 2010 by an independent appraiser. As at 31 December 2009 the related revaluation surplus of th USD 14 766 was initialy recognized in equity, as at 31 December 2010 it was additionally recognized in the amount of th USD 4 326.

The revaluation surplus included in equity in respect of an item of property, plant and equipment is transferred directly to retained earnings as the asset is used by an entity (in the amount that is the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost) and when the asset is derecognized (in the full amount).

Effect of foreign currency translation

Effect of foreign currency translation comprises all foreign exchange differences arising from the translation of the financial statements into presentation currency.

Dividend policy

The Croup's policy is to pay dividends at a level consistent with the Group's growth and development plans, while maintaining a reasonable level of liquidity. The current intention of the Management is to recommend to the General Meeting of Shareholders not to declare dividends for the three months ended 31 March 2014 and 2013.

Legal reserve

From the annual net profits of the parent company, 5% have to be allocated to the legal reserve. This allocation shall cease to be required as soon and as long as such surplus reserve amounts to 10% of the capital. This reserve may not be distributed to the shareholders.

32. Information on segments

A business segment is a separable component of a business entity that produces goods or provides services to individuals (or groups of related products or services) in a particular economic environment that is subject to risks and generates revenues other than risks and income of those components that are peculiar to other business segments.

For the purpose of management the Group is divided into the following business segments on the basis of produced goods and rendered services, and consists of the following 3 operating segments:

- Farming division - a segment, which deals with cultivation and sale of such basic agricultural crops as corn and wheat;
- Live-stock breeding - a segment which deals with breeding and sale of biological assets and agricultural products of live farming. Basic agricultural product of live farming for sale in this segment is milk;
- Storage and processing- a segment which deals with processing of agricultural produce, and also with production of finished goods. Principal goods produced and sold within this segment are flour and fodder.
