

Unaudited interim consolidated report
for the three months FY2015 ended
30th September 2014

COAL ENERGY S.A., 3M FY2015 REPORT

Dear Ladies and Gentlemen,

Herewith we are presenting our interim consolidated financial report for the 1Q FY2015 containing unaudited financial data. As disclosed in the current reports no. 15/2014 dated August 28, 2014, and no. 18/2014 dated October 17, 2014, as well as in the Annual report for the 12 months FY2014 the Company postponed the annual audit procedure until the armed unrests in the region of Company's operations are resolved and access to assets as well as to documentation are safe. As of the date of this report circumstances preventing initiation of the audit procedure continue their negative influence.

The Company will duly inform the Shareholders and investment society through current reports, its web page and other available means of communications about any changes for the renewal of the audit.

The macroeconomic difficulties and escalating armed unrests in the region of Company's operations notably influenced the macro-economy and various businesses. Industrial output decrease went on during the 1Q FY2015 adversely impacting the Company's core markets. During the 9 months 2014 calendar year industrial output cutback comprised 8.6% y-o-y (during 6 months 2014 calendar year industrial output contraction composed 4.7% y-o-y). Reduced industrial activity has led in the 1Q FY2015 to lower electricity production by 9.4% y-o-y and lower electricity consumption (netto) by 13.2% y-o-y. Starting August 2014 Ukraine has left the top-10 world crude steel producers based on the data of the World Steel Organization.

Predominantly these circumstances together with the increased risks of human casualties, disruption of logistics routes and infrastructure limiting coal output and supply affected the Company's operational and financial results for the 3 months FY2015:

- ❖ **Mining output.** Mining output of thermal and coking coal in the 1Q FY2015 reached 9.5 thousand tonnes, or decreased by 85.8% q-o-q incorporating the increased production risks in the region.
- ❖ **Coal volume sales.** In the 1Q FY2015 total coal volume sales composed 66.4 thousand tonnes generated mainly from coal trading operations, which means 86.9% decrease q-o-q in the sales volumes as a result of higher transportation risks in the region.
- ❖ **Revenue from coal sales.** In the 1Q FY2015 coal sales revenue reached US\$4.7 million (decreased by 82.1% q-o-q).
- ❖ **EBITDA.** EBITDA comprised -US\$0.3 million during the 1Q FY2015 compared to the positive EBITDA of US\$1.0 million in the 1Q FY2014.

The Group will be further concentrated on cost cutting, managing accounts receivable and restructuring of the existing loan facilities until the time of military conflict resolution and renewal of coal production. Nonetheless people's health and safety are our top priority and for this reason the Company will temporarily operate in the limited scope.

Coal is the available domestic sources of energy, hence, demand for it still remains high in our opinion. Nevertheless coal output recovery and recovery of coal sales volumes will be based on soon as possible settlement of the unrests and implementation of economic reforms in the country.

Viktor Vyshnevetsky

Chairman of the Board of Directors and Chief Executive Officer

COAL ENERGY S.A., 3M FY2015 REPORT

Review of the financial and operational results of Coal Energy S.A. including parent company and its subsidiaries (hereinafter “Company”) for the 3 months (1Q) FY2015

As addressed in the *Letter to the Shareholders* above and in the *Annual Report for FY2014* the armed conflict in the East of Ukraine adversely affected operational and financial performance of the Company, coal and steel industry in general as well as macroeconomic stability in Ukraine. Intensification of the armed unrests in July 2014 practically stopped production of thermal and coking coal in the coal basin accounting for appr. 80% coal output in the country and affected all the businesses in the region.

In September 2014 International Monetary Fund based on its expectation of the continuing armed unrests worsened its expectations for the Ukraine’s economy recession (change of gross domestic product in real terms) in 2014 calendar year from 6.5% y-o-y to 7.3% y-o-y. For 2015 calendar year the reduction is expected to be at 4.3% y-o-y with the reservation that the unrests will continue in 2015 calendar year. Decreasing inflow from metallurgy export revenues put additional pressure on the local currency which continued devaluation throughout the 1Q FY2015.

Decreasing gross domestic product and industrial output have led in the 1Q FY2015 to lower electricity consumption (netto) by 13.2% y-o-y (since the beginning of 2014 calendar year the decrease in electricity consumption comprised 8.0% y-o-y) and lower electricity production by 9.4% y-o-y (since the beginning of 2014 calendar year electricity production decrease comprised 4.7% y-o-y).

Increasing coal production risks amid active armed unrests during the 1Q FY2015 forced thermal coal production decrease by 34.7% y-o-y (since the beginning of 2014 calendar year the decrease comprised 10.4% y-o-y).

The upcoming heating season forced the Ukrainian government to consider prohibition on thermal coal export as well as to undertake import of thermal coal from the South African Republic with the delivery starting October 2014. Coal imports from the Russian Federation are not excluded given the lack of anthracite coal grades specific for burning at the local power and heating plants.

Coking coal sector was following the steel industry and reacted on the increased production and transportation risks in the region. During the 1Q FY2015 steel production decrease continued. As a result Ukraine has left the top 10 world steel producers (annual production output comparison bases). According to the estimations of the World Steel Organization crude steel production in Ukraine decreased in the 1Q FY2015 by 25.5% q-o-q and decreased by 28.7% y-o-y.

Following the armed unrests in the coal basin and low demand from the steel producers country’s coking coal production decreased during the 1Q FY2015 by 47.2% q-o-q, by 50.9% y-o-y.

The following table summarizes the Company’s key margins and ratios for the 1Q FY2015, the 4Q FY2014, 1Q FY2014 (numbers are rounded):

COAL ENERGY S.A., 3M FY2015 REPORT

<i>in million of US\$</i>	1Q FY2015	4Q FY2014	Relative change q-o-q	1Q FY2014	Relative change y-o-y
Revenue	5.6	27.2	(79.4%)	29.0	(80.7%)
Gross profit	1.1	7.1	(84.5%)	4.7	(76.6%)
EBIT	(2.3)	0.5	n/a	(2.1)	n/a
EBITDA	(0.3)	2.6	n/a	1.0	n/a
Net loss	(4.0)	(12.5)	n/a	(5.6)	n/a
<i>as a percentage of revenue</i>					Δ percentage points
Gross margin %	19.6%	26.1%	(6.5)	16.2%	3.4
EBIT %	(41.1%)	1.8%	(42.9)	(7.2%)	(33.9)
EBITDA %	(5.4%)	9.6%	(15.0)	3.4%	(8.8)
Net earnings %	(71.4%)	(46.0%)	(25.4)	(19.3%)	(52.1)
Ratios:					
EBITDA/Finance costs	(0.1)	0.2		0.3	
Debt*/EBITDA	14.7	12.0		10.9	
Net debt/EBITDA	14.6	11.8		10.5	

*-EBITDA for calculation of EBITDA/Finance costs is taken for the respective period presented. EBITDA for the Debt/EBITDA and Net Debt/EBITDA ratios calculation is taken for the last four consecutive quarters. Debt and Net debt include loans and finance lease liabilities (discounted future finance charges denominated in UAH for lease of two state-property integral complexes owned by CwAL LE "Sh/U Blagoveshenskoe" and CwAL LE "Mine St.MatronaMoskovskaya"). Calculation of Debt and Net debt excludes the amount of US\$20.0 million (non-current deposit) which was securing loan obligations under a loan with a Ukrainian bank.

Revenue

For the reporting period total revenue comprised US\$5.6 million versus US\$29.0 million for the 1Q FY2014 thus declining by 80.7% y-o-y. On quarterly basis total revenue from domestic and export operations demonstrated sharp decline by 79.4% q-o-q under circumstances of intensifying armed unrests and limited options for coal transportation from the region in conflict.

Coal sales volumes dynamics are presented in the table below (numbers are rounded):

<i>in thousand tonnes</i>	1Q FY2015	4Q FY2014	change in %	1Q FY2014	change in %
Thermal	66.2	432	(84.7%)	346	(80.9%)
Coking	0.2	74	(99.7%)	56	(99.6%)
Total	66.4	506	(86.9%)	402	(83.5%)

Sales volumes also shrank substantially both y-o-y and q-o-q. Thermal coal sales composed 66.4 thousand tonnes and decreased by 84.7% q-o-q and by 80.9% y-o-y while coking coal sales comprised only 200 tonnes in 1Q FY2015 revealing a decrease by 99.7% q-o-q and by 99.6% y-o-y. Thermal coal composed major part of coal sales volumes: 99.7% in the 1Q FY2015.

In the 1Q FY2015 Company's coal export sales comprised US\$0.4 million versus US\$0.7 million in the 1Q FY2014 and versus US\$1.6 million in 4Q FY2014 thus declining by 42.9% y-o-y and by 75.0% q-o-q accordingly.

Revenue from coal export sales composed 7.1% in total revenue in the 1Q FY2015 versus 2.4% in the 1Q FY2014 and 5.9% in the 4Q FY2014.

Starting the middle of 2014 calendar year the Company intensified coal trading activity. In the 1Q FY2015 coal trading comprised significant part of revenue and comprised US\$2.5 million.

COAL ENERGY S.A., 3M FY2015 REPORT

Cost of sales and cash cost of production

The following table links cost of sales with total cash cost of production in each business segment of the Company in the 1Q FY2015 and the 1Q FY2014:

<i>in thousand of US\$</i>	1Q FY2015	1Q FY2014
Cost of sales	4,512	24,363
Less:		
Cost of merchandising inventory	2,388	6,286
Change in inventories	579	6,136
Cost of other services	41	73
Depreciation and amortization	434	1,388
Total cash cost of production	1,070	10,480
<i>Including:</i>		
<i>Total cash cost of mining</i>	880	9,522
<i>Total cash cost of beneficiation</i>	55	218
<i>Total cash cost of waste dumps processing</i>	135	740
<i>in US\$ per tonne</i>		
<i>Cash cost of mining per 1 tonne of ROM coal</i>	93.2	58.8
<i>Cash cost of beneficiation per 1 tonne of ROM coal</i>	25.1	10.5
<i>Cash cost of waste processing per 1 tonne of saleable coal from waste dumps</i>	27.3	21.8

Cash cost of mining was under negative influence of higher fixed costs per 1 tonne of coal due to significantly lower of coal mining volumes and influence of conditionally fixed expenditures. During the 1Q FY2015 cash cost of mining increased substantially by 58.5% y-o-y.

Cash cost of beneficiation during the 1Q FY2015 also increased up to US\$25.1 per tonne, or 2.4 times.

Cash cost of coal waste processing increased by 25.2% compared to the 1Q FY2014 due to decreased amount of coal concentrate production and, hence, impact of conditionally fixed expenses. Starting July 30, 2014, coal waste processing plant stopped production due to bombing and shelling in the direct vicinity as disclosed previously.

Gross profit

Gross profit comprised US\$1.1 million as compared to US\$4.7 million in the 1Q FY2014 and US\$7.1 million in the 4Q FY2014 demonstrating a decline by 76.6% y-o-y and by 84.5% q-o-q accordingly.

Operating expenses

General and administrative expenses

General and administrative expenses decreased substantially for the 1Q FY2015 as compared to the same period of the previous financial year and comprised US\$0.4 million.

COAL ENERGY S.A., 3M FY2015 REPORT

The expenses decreased mostly in the items like wages and salaries of administrative personnel segment (from US\$0.9 million for the 1Q FY2014 to US\$0.1 million for the 1Q FY2015, or by 88.9% y-o-y) as a result of significant reduction of headcount. These expenses are negotiated, agreed and paid in the local currency and, hence, reduction is related mainly to the Ukrainian hryvnia devaluation. Also part of administrative employees terminated their employment or agreed to reduce their wage rate.

Selling and distribution expenses

Selling and distribution expenses also decreased to US\$0.3 million for the reported period as compared to US\$1.2 million for the 1Q FY2014, demonstrating substantial drop of 75.0% y-o-y, reflecting ceasing of business transactions and operations facing the armed conflict and local currency devaluation. Selling and distribution costs comprised 5.4% in relation to revenue for the 1Q FY2015 versus 4.1% for the 1Q FY2014.

Idle capacity expenses

Idle capacity expenses comprised US\$3.2 million for the 1Q FY2015 compared to US\$4.2 million on 1Q FY2014. As informed earlier for the sake of the employees' safety given the ongoing armed unrests and shooting in the region the management decided to limit production on its underground mining and coal processing assets in the 1Q FY2015 resulting in the idle capacity expenses.

Management of the Company uses estimations and judgments to determine the following items: normal capacity of the individual companies, the period of the partial exploitation of the production capacity, amount of overheads that should be allocated.

Operating loss / profit

In the 1Q FY2015 the Company recorded US\$2.3 million of operating loss, which remained almost flat y-o-y compared to US\$2.1 million of operating loss in 1Q FY2014 while operating result of the 4Q FY2014 representing marginal operating profit of US\$0.5 million. Consequently operating profit margin was negative for the 1Q FY2015.

Financial costs

In the reporting quarter financial costs reached US\$4.5 million compared to US\$3.3 million in the 1Q FY2014, increased by 36.4%, mainly due to loss from non-operational exchange differences as a result of local currency depreciation.

Net loss / profit

Net loss for the period comprised US\$4.0 million for the 1Q FY2015 compared to the net loss of US\$5.6 million for the 1Q FY2014 and net loss of US\$12.5 million for the 4Q FY2014.

Other comprehensive loss / income

Sharp depreciation of the reporting currency (local currency Ukrainian hryvnia) resulted in the other comprehensive loss (arising mainly from the intragroup loans) of US\$8.5 million during the 1Q FY2015.

COAL ENERGY S.A., 3M FY2015 REPORT

Production results

Coal Energy was forced to limit the production in the region of armed conflict in the East of Ukraine. From the beginning of financial year commenced on July 01, FY2015, most of the production assets are working in the sustaining mode to maintain safety of operations and readiness for production start. The Company is expecting to inform about renovation of coal output expectations after the armed unrests are resolved.

Total production in 1Q FY2015 composed 14.4 thousand tonnes or was 92.6% down as compared to 1Q FY2014.

Underground mining. In the 1Q FY2015 mining output decreased to 9.5 thousand tonnes from 161.9 thousand tonnes for the 1Q FY2014, or by 94.1% y-o-y. Mining of thermal coal decreased by 98.2% y-o-y to 2.4 thousand tonnes while mining output of coking and dual-purpose coal decreased by 74.0% y-o-y to 7.1 thousand tonnes.

The table below shows aggregated data on production volumes by coal types:

<i>in thousand of tonnes</i>	1Q FY15	4Q FY14	change, %	1Q FY14	change, %
Thermal coal	2.4	36.6	(93.4%)	134.6	(98.2%)
Coking and dual-purpose coal	7.1	30.2	(76.5%)	27.3	(74.0%)
Coal concentrate from waste processing	4.9	23.0	(78.7%)	33.9	(85.5%)
Total production	14.4	89.8	(84.0%)	195.8	(92.6%)

Coal waste dumps processing. During the 1Q FY2015 production of coal from waste dumps processing (basically during July 2014) composed 4.9 thousand tonnes, or decreased by 85.5% y-o-y.

Beneficiation. Beneficiation of own coal mined and bought from third parties reached 2.2 thousand tonnes for the 1Q FY2015, decreased by 89.4% y-o-y compared to the 1Q FY2014. During 1Q FY2015 no beneficiation services to third parties were provided

Risks and uncertainties

The Company's financial performance is dependent on the global price of and demand for coal

The Company's business is dependent on the global market price of coal. Sale prices and volumes in the worldwide coal market depend predominantly on the prevailing and expected levels of demand for and supply of coal, mainly from energy and steel manufacturers. Though Ukrainian coal market is a bit isolated, still global financial and economic crises may influence the Ukrainian coal prices.

To mitigate the price risk and risk of lowering demand, the Company endeavours to diversify its customer base both on local and export markets and aims to sign long-term framework contracts for coal supply.

While prices are beyond control of the Company we constantly strive to lower and maintain low cost of production with the same level of operations quality.

COAL ENERGY S.A., 3M FY2015 REPORT

The Company is subject to particular demands from customers which vary from customer to customer from product to product and from time to time

As the customer may require coal with higher efficiency characteristics the increased demand for higher grade coal may reduce demand and contract prices for coal with reduced energy efficiency.

The Company's production costs and costs of technologies applied by the Company may increase

The Company's main production expenses are energy costs, salaries and consumables. Changes in costs of the Group's mining and processing operations could occur as a result of unforeseen events and consequently result in changes in profitability or the feasibility and cost expectations in mining and processing existing reserves. Many of these changes may be beyond the Company's control.

Cost of mining operations per tonne as conditionally fixed (energy, water drainage, ventilation system, etc.) can not be reduced proportionally with the reduction of coal sales as the case may be. These costs need to be incurred in order to maintain certain safety of operations and to secure the Company's ability to increase production after the market revival. If sales for some particular coal grades from a particular asset are not expected to regain back their volume and price the Company may take decision to postpone mining operations on that asset and incur repairing and supportive works and hence incurring idle capacity expenses. Returning to the previous production levels may require additional capital investments amount of which can not be estimated reliably at the moment.

The risk has been realized as most of the Company's assets incurred various levels of damage due to heavy shooting and bombing at assets' locations. Hence various level of reconstruction for renovation of mining and coal waste processing will be needed. Exact amounts are still to be estimated.

Due to the on-going armed conflict in the region there is a lack of strong supervision from the local authorities over the businesses as well as over any illegal mining activities in the region which may increase following the coal deficit in the market. Coal from such activities being cheaper in price may create further barriers for coal production restoration at state and privately held mines.

The Company's activity may be impacted by limited banking financing for its projects and operating activity as well as local currency devaluation

In order to continue investment program at the levels which would allow reaching the expected targets the Company needs external financing. Macroeconomic and political instability in the country make the banks reassess their country risk policies and they may either stop providing new financing to customers or even lower their credit exposures.

Macroeconomic instability could also push the population to transfer their savings into US\$ (creating devaluating pressure on the local currency) and/or even to take their savings away from the banking system which may additionally squeeze the banking system's liquidity.

COAL ENERGY S.A., 3M FY2015 REPORT

During the last years foreign currency loans had a more attractive interest rate, had longer tenors of financing and were easier available than local currency (hryvnia) loans, hence foreign currency loans may be more attractive in general.

Nevertheless foreign currency loans expose to the exchange rate risks which may inflate liabilities denominated in the foreign currencies in case of local currency devaluation. In order to fulfil obligations under the conditions of limited export proceeds restructuring may be needed with the goal of extending maturities and postponing interest payments until the markets rebound and sufficient resources are accumulated to cover the realized risk.

The Company can not exclude the risk of further devaluation of hryvnia.

The Company's activity may be influenced by political instability and/or uncertainty and/or separatism intentions and escalation of military conflict in Ukraine

Failure to achieve political consensus necessary to support and implement reforms and any resulting instability could adversely affect the country's macroeconomic indices, economic growth, business climate, social and living standards, postpone business decisions by customer and major industrial groups. Such increased uncertainties will definitely affect the industrial output level in the country, electricity, heat and steel production and consumption as well as construction plans and metallurgic industry performance (being directly or indirectly the core consumers for the Company's products), tax payments to the state budget.

The military conflict in the region of the Company's assets allocation may lead to damages to assets and inventories. Furthermore, depending on the severity of the conflict the assets/inventories may be damaged in scope which will make it impossible or economically not viable to restore them.

The realization of the risk is considered to be high. Mitigation of the risk is mainly outside of control of the Company on macro level.

Any unfavourable changes in Ukraine's regional relationships, especially with the Russian Federation, may adversely affect the Ukrainian economy and hence business environment

Ukraine's economy depends heavily on its trade flows with Russian Federation and other CIS countries because Ukraine imports a large proportion of required energy resources, mainly from Russian Federation (and from other countries that deliver energy resources to Ukraine through Russian Federation). In addition, a large portion of the Ukrainian export service proceeds come from transit charges for oil, gas and ammonia from Russian Federation. As a result, Ukraine considered its relations with Russian Federation to be of strategic importance. Apart from Russian Federation, Ukraine also developed significant relationships with certain countries of the European Union (including Germany, Poland, Hungary, Slovakia and Romania), as well as with Turkey.

If bilateral trade relations between Russian Federation and Ukraine are to deteriorate, this may have negative impact on the Ukrainian economy as a whole and thus on the Company's business, results of operations, financial conditions and prospects as industrial output in the country may shrink. Respectively demand for energy and consequently demand for thermal and coking coal may decrease.

COAL ENERGY S.A., 3M FY2015 REPORT

Considerable dependence of the Ukrainian economy on Russian energy exports together with increase in natural gas price by Russian Federation may adversely affect the pace of economic growth of Ukraine. Furthermore, gas price increases may force Ukraine to launch certain reforms in the energy sector and modernization of major energy-consuming industries through the implementation of efficient technologies, modernization of production facilities as well as establishing diversified sources gas supply. While defending its geopolitical interests Russian Federation may execute economic pressure either through trade wars or prices for energy resources imported by Ukraine. If escalation of interests clashes proceeds this may ruin and demoralize the existing industrial and supply chains putting development and prospects of any business sector in question and hence affect energy demand.

The realization of the risk is considered to be high. The Company does not possess resources to mitigate the described risk on macro level.

Liquidity risk

As one of the major consequences of decreasing prices and lowering demand for coal is that the Company may need additional means to promote sales, i.e. providing customers with favourable trade credit terms, hence increasing working capital tied up mostly in the trade account receivables. If financial resources from lending institutions are available these additional working capital amounts could be financed respectively. The Company is in constant dialogue with its current financing banks in order to secure timely rolling over and extending of the credit facilities. Nevertheless the ability of banking institutions to lend depends highly on country risks of Ukraine and there own liquidity (UAH liquidity is formed mainly from the deposits of the local individuals and enterprises) which diminishes dramatically in the times of macroeconomic and political instability. In the situation of absence of bank financing to cover the increased trade credit conditions the Company will be forced to decrease sales.

The Company is cooperating with a number of private commercial banks which are subject to the regulations of the Ukrainian authorities. Banks' ability to perform in accordance with such regulations is out of control of the Company. Nevertheless if banks fail to comply with the Ukrainian legislation the regulator may impose various sanctions against them which may influence the ability of such banks to provide financing resources or might force the banks to draw back the financial resources provided to the Company if the Company does not fulfil obligations according to the loan agreements.

The Company can not mitigate the risk that the banks may demand early repayment and the Company will not be able to fund refinancing for such funds.

Statement of Management responsibility

To the best of our knowledge, consolidated financial statements as of 30 September 2014 of Coal Energy S.A. which have been prepared in accordance with the international financial reporting standards, give a true and fair view of the assets, liabilities, financial position and result of its operations for the three months ended 30 September 2014 as required under article 4(3) of the Law. The interim management report includes a fair review of the information required under article 4(4) of the Law.

While preparing these consolidated financial statements, the Management bears responsibility for the following issues:

- selection of the appropriate accounting policies and their consistent application;
- making judgments and estimates that are reasonable and prudent;
- adherence to IFRS concepts or disclosure of all material departures from IFRS in the consolidated financial statements;
- preparation of the consolidated financial statements on the going concern basis.

Management confirms that it has complied with the above mentioned principles in preparing the consolidated financial statements of the Group.

The Management is also responsible for:

- keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Group;
- taking reasonable steps to safeguard the assets of the Group and to prevent and detect fraud and other irregularities.

On behalf of management

Luxembourg, 25 November 2014

Coal Energy S.A.**Management report for the three months ended 30 September 2014**

Management of the Company hereby presents its interim consolidated financial statements for the year three months on 30 September 2014.

1. Results and developments during the three months ended on 30 September 2014.

For the three months ended on 30 September 2014 the Group recorded an EBITDA loss of USD 294 thousand (EBITDA profit for the three months ended 30 September 2013 USD 1,049 thousand). After depreciation, amortization, finance costs and finance income the final loss for the three months ended 30 September 2014 after taxation was USD 3,995 thousand (loss for the three months ended 30 September 2013 USD 5,592 thousand).

2. Future developments of the Group.

The Group is optimizing internal reserves and is considering remaining options for funding its operations to cover liquidity needs in the environment of continuing military conflict in the Eastern Ukraine.

3. Activity in the field of research and development.

The Group is not involved in any activity in the field of research and development.

4. Own shares.

During the period ended 30 September 2014, the Company and its affiliates have not repurchased shares of Coal Energy S.A.

5. Group's internal control.

Management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Our internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Group;
- provide reasonable assurance that transactions are recorded, as necessary, to permit preparation of financial statements in accordance with IFRS;
- provide reasonable assurance that receipts and expenditures of the Group are made in accordance with authorizations of Group's management and directors; and
- provide reasonable assurance that unauthorized acquisition, use or disposition of Group's assets that could have a material effect on the financial statements would be prevented or detected on a timely basis.

Because of its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of our financial statements would be prevented or detected. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

6. Risk Management.

The Group has implemented policies and procedures to manage and monitor financial market risks. Financial market activities are overseen by the CFO and the Group Management Board.

The Group does not use hedging derivatives.

Coal Energy Ukraine LLC	Ukraine	99,99	99,99
Progress-Vugillya LLC	Ukraine	99,99	99,99
Sh/U Blagoveshenskoe Management Company LLC	Ukraine	99,99	99,99

The parent company, Coal Energy S.A., was incorporated in Luxembourg as a joint stock company on 17 June 2010. The registered office is located at 46A, avenue J.F. Kennedy, L-1855 Luxembourg and the Company number with the Registre de Commerce is B 154144.

Principal activities of the Group are coal mining, coal beneficiation, waste dumps processing and sales of marketable coal. Major production facilities are located in Donetsk region of Ukraine.

These consolidated financial statements were authorized by the Board of Directors as at 25 November 2014.

2 Basis of preparation of the interim consolidated financial statements
2.1 Basis of preparation

The preparation of financial statements in accordance to International Financial Accounting Standards (IFRS) as adopted by European Union requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying of the Group’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

These consolidated financial statements are presented in thousands of USD, unless otherwise stated.

2.2 Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (IFRS) adopted by the European Union.

2.3 Basis of consolidation
(a) Subsidiaries

Subsidiaries are entities over which the Group has the power to govern the financial and operating policies. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

2 Basis of preparation of the interim consolidated financial statements (continued)

The excess of the cost of acquisition over the fair value of the group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the statement of comprehensive income. Costs, appeared in connection with the purchase of subsidiaries are recognized as expenses.

Inter-Group transactions, balances and unrealized gains on transactions between Group companies are eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group. A change in the ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction. Subsequent to the loss of control of a subsidiary the value of remained share is revalued at fair value that influences the amount of income/loss from the disposal.

Before June 30, 2010 the Parent company did not have direct or indirect ownership interest in consolidated entities included in the consolidated financial statements. The pooling of interest method was applied for business combinations under common control for the earlier periods.

Financial statements of Parent company and its Subsidiaries, which are used while preparing the consolidated financial statements, should be prepared as at the same date on the basis of consistent application of accounting policy for all companies of the Group.

(b) Transactions with non-controlling interests

The Group applies a policy of treating transactions with non-controlling interests as transactions with parties external to the Group. The result of disposals to non-controlling interests being the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary are reflected in statements of changes in equity. Losses are attributed to the non-controlling interests even if that results in a deficit balance.

Non-controlling interests are derecognized when purchased, a subsidiary sold or liquidated and profit or loss on de-recognition is recorded in the consolidated statements of changes in equity.

2.4 Changes in accounting policy and disclosures

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

The group has not applied the following standards and IFRIC interpretations and also amendments to them that have been issued but are not yet effective:

IFRS 9 Financial Instruments: Classification and Measurement - phase 1 of the accounting standard that will eventually replace IAS 39 Financial Instruments: Recognition and Measurement (effective from 1 January 2015);

IFRS 10 Consolidated Financial Statements, IFRS 11, Joint Arrangements, IFRS 12, Disclosure of Interests in Other Entities, IAS 27 (revised), Consolidated and Separate Financial Statements, and IAS 28 (revised), Investments in Associates and Joint Ventures. Application of these standards is mandatory for annual periods beginning on or after January 1, 2014;

IFRS 12 Disclosure of Interest in Other Entities that applies to an entity that has interest in subsidiaries, joint arrangements, associates and/or structured entities (effective from 1 January 2014);

IFRS 13 Fair Value Measurement describes how to measure fair value where fair value required or permitted by IFRS (effective from 1 January 2014);

The Group anticipates that the adoption of these standards and amendments in future periods will have no material impact on its financial statements. The Group currently does not plan early application of the above standards and interpretations.

3 Summary of significant accounting policies

The accounting policies, significant accounting judgments, estimates and assumptions adopted in the preparation of the interim consolidated financial statements are consistent with those followed in the preparation of the Group's interim financial statements for the three months ended 30 September 2013.

3.1 Currency translation

(a) Functional and presentation currency

All items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entities operate (the "functional currency"). The national currency of Ukraine, Ukrainian Hryvnia ("UAH") is the functional currency for the Group's entities that operate in Ukraine. For the entities that operate in Cyprus, Luxembourg and British Virgin Islands (BVI) the functional currency is US dollar ("USD"). These consolidated financial statements are presented in thousands of US dollars, unless otherwise stated.

(b) Foreign currency transactions

Exchange rates used in the preparation of these in interim consolidated financial statements were as follows:

Currency	30 September 2014	Average for three months ended 30 September 2014	30 September 2013	Average for the three months ended 30 September 2013	30 June 2014
UAH/USD	12.9492	12.5772	7.9930	7.9930	11.8233

(c) Translation into presentation currency:

- all assets and liabilities, both monetary and non-monetary, are converted at closing exchange rates at the dates of each statements of financial position presented;

- income and expense items are converted at the average exchange rates for the period, unless exchange rates fluctuate significantly during the period, in which case exchange rates at the date of transactions are used;

- all equity items are converted at the historical exchange rates;

- all resulting exchange differences are recognized as a separate component in other comprehensive income;

- in the consolidated statements of cash flows, cash balances and beginning and end of each period presented are converted at exchange rates at the respective dates. All cash flows are converted at the average exchange rates for the periods presented. Resulting exchange differences are presented as effect of conversion to presentation currency.

3 Summary of significant accounting policies (continued)

3.2 Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group, the revenue can be reliably measured and when specific criteria have been met for each of the Group's activities as described below. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved. The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating sales within the Group.

(a) Sales of goods

The Group principal activities are stated in Note 1. Revenue from sales of goods is recognized when all criteria are satisfied:

- the entity has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the entity; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

The transfer of the risks and rewards of ownership coincides with the transfer of the legal title or the passing of possession to the buyer.

(b) Rendering of services

Revenue from rendering services is recognized on the basis of the stage of work completion under each contract. When financial result can be measured reliably, revenue is recognized only to the extent of the amount of incurred charges, which can be recovered.

(c) Interest income

For all financial instruments measured at amortized cost and interest bearing financial assets classified as available-for-sale, interest income or expense is recorded using the effective interest rate, which is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or liability. Interest income is included in finance income in the statement of comprehensive income.

(d) Emission rights

Due to high level of uncertainty income from sale of Emission Reduction Units recognized in other operating income on cash basis and do not recognized as intangible asset.

3.3 Income tax expense

Income tax expense represents the sum of the tax currently payable and deferred tax.

Income tax is recognized as an expense or income in profit and loss in the consolidated statements of comprehensive income, except when it relates to items recognized directly in other comprehensive income, or where they arise from the initial accounting for a business combination.

(a) Current tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to estimate the amount are those that are enacted or substantively enacted, by the reporting date, in the countries where the Group operates and generates taxable income. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

(b) Deferred tax

Deferred tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;

- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized except:

- where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;

- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

3 Summary of significant accounting policies (continued)

3.4 Property, plant and equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and/or accumulated impairment losses, if any. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the statements of comprehensive income during the financial period in which they are incurred. Major renewals and improvements are capitalized and the assets replaced are retired. Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognized in item 'Other non-operating income (expenses)' in the statement of comprehensive income.

Depreciation is calculated using the straight-line method to allocate their revalued amounts to their residual values over their estimated useful lives, as follows:

-	Underground mining	40 - 80 years
-	Buildings and constructions	35 - 50 years
-	Machinery, equipment and vehicles	5 - 10 years
-	Other	3 - 5 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each financial year end.

Mine development costs are capitalized and classified as capital construction-in-progress. Mine development costs are transferred to mining assets when a new mine reaches commercial production quantities. In addition capital construction-in-progress comprises costs directly related to construction of buildings, infrastructure, machinery and equipment. Cost also includes finance charges capitalized during construction period where such costs are financed by borrowings. Depreciation of these assets commences when the assets are put into operation.

3.5 Leases

(a) Group as a lessee

Leases of property, plant and equipment in which substantially all the risks and rewards incidental to ownership are transferred to the Group are classified as finance leases. The assets leased are capitalized in property, plant and equipment at the commencement of the lease at the lower of the fair value of the leased asset and the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized in profit and loss in the consolidated statements of comprehensive income. Leased assets are depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating lease payments are recognized as an expense in the income statements on a straight line basis over the lease term.

(b) Group as a lessor

Leases where the Group does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same bases as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

3.6 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

3.7 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in profit or loss in the period in which the expenditure is incurred. Research costs are recognized as an expense as incurred. Costs incurred on development (relating to the design, construction and testing of new or improved devices, products, processes or systems) are recognized as intangible assets only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of adequate resources to complete the development, and the ability to measure reliably the expenditure during the development. Other development expenditures are recognized as an expense as incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. Amortization is charged on a straight-line basis over the following economic useful lives of these assets:

-	Licenses, special permissions and patent rights	5 - 20 years
-	Other intangible assets	5 - 10 years

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash generating unit level.

3 Summary of significant accounting policies (continued)

3.8 Impairment of non-current assets

The carrying amounts of the Group's assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Recoverable amount is the higher of fair value less cost to sell and value-in-use.

An impairment loss is recognized whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognized in the consolidated statements of comprehensive income.

Where an impairment loss subsequently reversed, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the original carrying amount that would have been determined had no impairment loss been recognized in prior periods. A reversal of an impairment loss is recognized in the consolidated statements of the comprehensive income.

3.9 Financial assets

(1) Initial recognition and measurement

The Group classifies its financial assets as financial assets at fair value through profit or loss; loans and receivables; held-to-maturity investments; available-for-sale financial assets. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets at initial recognition and re-evaluates this designation at every reporting date. The Group's financial assets include cash and short-term deposits, trade and other receivables, loan and other receivables. All financial assets are recognized initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs. Fair value at initial recognition is best evidenced by the transaction price. A gain or loss on initial recognition is only recorded if there is a difference between fair value and transaction price which can be evidenced by other observable current market transactions in the same instrument or by a valuation technique whose inputs include only data from observable markets. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

(2) Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

(a) Financial assets at fair value through profit or loss

This category includes financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Receivables include trade and other receivables. Loans are financial assets arising as a result of provision of funds to borrower.

(c) Held-to-maturity investments

Investments with fixed or determinable payments and fixed maturity that management has the positive intent and ability to hold to maturity, other than loans and receivables originated by the Group, are classified as held-to-maturity investments. Such investments are included in non-current assets, except for maturities within twelve months from the reporting date, which are classified as current assets.

(d) Available-for-sale financial assets

Investments intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, are classified as available-for-sale; these are included in non-current assets unless management has the express intention of holding the investment for less than 12 months from the reporting date or unless they will need to be sold to raise operating capital, in which case they are included in current assets. Available-for-sale financial assets are accounted at fair value through equity.

Subsequent to initial recognition all financial assets at fair value through profit or loss and all available-for-sale instruments are measured at fair value, except that any instrument that does not have a quoted market price in an active market and whose fair value cannot be reliably measured is stated at cost, including transaction costs, less impairment losses.

Loans and receivables and held-to-maturity assets are measured at amortized cost less impairment losses. Amortized cost is calculated using the effective interest rate method. Premiums and discounts, including initial transaction costs, are included in the carrying amount of the related instrument and amortized based on the effective interest rate of the instrument.

Receivables are accounted at net realizable value, less the allowance for doubtful debts. The amount of allowance for doubtful debts is accounted by using the method of total amount of doubtful debts.

After initial measurement, available-for-sale financial investments are subsequently measured at fair value with unrealized gains or losses recognized as other comprehensive income in the available-for-sale reserve until the investment is derecognized, at which time the cumulative gain or loss is recognized in other operating income, or determined to be impaired, at which time the cumulative loss is recognized in the income statement in finance costs and removed from the available-for-sale reserve.

(3) Impairment of financial assets

The Group assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

3 Summary of significant accounting policies (continued)

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of receivables, loans issued where the carrying amount is reduced through the use of an allowance for impairment. When a trade or other or loans issued receivables is considered uncollectible, it is written off against the allowance. On basis of the facts confirming that receivables or loans issued, previously recognized as doubtful, at the reporting date are not doubtful, the amount of previously charged reserve is reflected in income of the reporting period. Except for available-for-sale assets, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss reverses directly through profit and loss account. The reversal shall not result in a carrying amount of the financial asset that exceeds what the amortized cost would have been had the impairment not been recognized at the date the impairment is reversed.

When a decline in fair value of an available-for-sale investment has been recognized directly in other comprehensive income and there is objective evidence that investment is impaired, the cumulative loss that had been recognized directly in other comprehensive income is removed from other comprehensive income and recognized in profit or loss in the consolidated statements of comprehensive income even though the investment has not been derecognized. Impairment losses previously recognized through profit or loss in the consolidated statements of comprehensive income are not reversed. Any increase in fair value subsequent to an impairment loss is recognized directly in other comprehensive income.

(4) Derecognition of financial assets

The Group derecognizes financial assets when:

- the assets are redeemed or the rights to cash flows from the assets have otherwise expired;
- or the Group has transferred substantially all the risks and rewards of ownership of the assets;
- or the Group has neither transferred not retained substantially all risks and rewards of ownership but has not retained control. Control is retained if the counterparty does not have the practical ability to sell the asset in its entirety to an unrelated third party without needing to impose additional restrictions on the sale.

3.10 Inventories

Inventories are recorded at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale. The cost of inventories is assigned by using the FIFO cost formula.

The cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. The cost of work in progress and finished goods includes costs of raw materials, direct labour and other direct productions costs and related production overheads (based on normal operating capacity).

The Group periodically analyses inventories to determine whether they are damaged, obsolete or slow-moving or if their net realizable value has declined, and makes an allowance for such inventories. If such situation occurred, the sum remissive the cost of inventories should be reflected in statements of comprehensive income. If the circumstances that caused the write-down no longer exist, the amount of the write-down is reversed.

At the date of financial statements preparation the Group estimates the balances of finished products to determine whether there is any evidence of impairment. Amount of impairment is measured on the basis of the analysis of prices in the market of such inventories, existed at the reporting date and issued in official sources.

3.11 Value added tax (VAT)

VAT output equals the total amount of VAT collected within a reporting period, and arises on the earlier of the date of shipping goods to a customer or the date of receiving payment from the customer. VAT input is the amount that a taxpayer is entitled to offset against his VAT liability in a reporting period. Rights to VAT input arise on the earlier of the date of payment to the supplier or the date goods are received. Revenue, expenses and assets are recognized less VAT amount, except cases, when VAT arising on purchases of assets or services, is not recoverable by tax authority; in this case VAT is recognized as part of purchase costs or part of item of expenses respectively. Net amount of VAT, recoverable by tax authority or paid, is included into accounts receivable and payable, reflected in consolidated statements of financial position.

3.12 Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks, other short term highly liquid investments with original maturities of six months or less.

For the purpose of the consolidated statements of cash flows, cash and cash equivalents comprise cash and short term deposits as defined above, net of outstanding bank overdrafts.

3.13 Share capital

Ordinary shares are classified as equity. Nominal value of share capital of Parent company is specified in Note 24.

3.14. Legal reserve

Luxembourg companies are required to allocate to a legal reserve a minimum of 5% of the annual net income, until this reserve equals 10% of the subscribed share capital. This reserve may not be distributed.

3 Summary of significant accounting policies (continued)

3.15 Financial liabilities

(1) Initial recognition and measurement

The Group classifies its contractual obligations as financial liabilities at fair value through profit or loss, loans and borrowings. The Group classifies its financial liabilities at initial recognition. Financial liabilities, including borrowings, are initially measured at fair value, net of transaction cost.

The Group's financial liabilities include trade and other payables, bank overdraft, loans and borrowings.

(2) Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

(a) Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and those designated at initial recognition as liabilities at fair value through profit or loss.

(b) Loans and borrowings

Loans and borrowings are financial liabilities which the Group has after borrowings attraction. Loans and borrowings are classified as current liabilities except when the Group has unconditional right to delay settlement of obligation at least for 12 months from reporting date.

(3) Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized through profit or loss.

3.16 Defined benefits plan obligations

The Group contributes to the Ukrainian state pension scheme, social insurance and employment funds in respect of its employees. The Group's pension scheme contributions are expensed as incurred. The contributions are included in expenses for wages and salaries. Companies comprising the Group provide additional post-employment benefits to those employees who are engaged in the industry with particularly detrimental and oppressive conditions of work. Under the Ukrainian legislation employees engaged in hazardous industry may retire earlier than usual terms stipulated by Employee Retirement Income Security Law. The Group reimburses to the State Pension Fund all pension payments which are to be paid to the employees until usual statutory date of retirement. In addition, according to the legislation, the Group makes payments related to providing the employees with domestic fuel (coal). The Group recognizes the liabilities in amount of this payment.

The liability recognized in the statement of financial position in respect of post-employment benefits is the present value of the defined benefit obligation at the balance sheet date together with adjustments for unrecognized actuarial gains or losses. The cost of providing benefits under the defined benefit plans is determined using the projected unit credit method.

Actuarial gains and losses are recognized in the other comprehensive income statements in the period in which they occur.

3.17 Provisions

Provisions are recognized when the Group has legal or constructive obligations as the result of past event for which it is probable that an outflow of economic benefits can be required to settle the obligations, and the amount of the obligations can be reliably estimated. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the statement of financial position date, taking into account the risks and uncertainties surrounding obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. Use of discounting results in recognition of financial expenses and increase in provision.

Management created provision for the payment of potential tax liabilities related to settlement of financial assets and liabilities. Though if the controlling authorities classify such transactions as a subject of taxation and apply such classification to the companies of the Group, actual taxes and penalties may differ from the Management assessment.

3.18 Environmental obligations

Environmental obligations include decommissioning and land restoration costs. The Group evaluates the provisions associated with ecological problems separately on every occasion taking into account the requirements of the relevant legislative acts.

Future decommissioning costs, discounted to net present value, are capitalized and the corresponding decommissioning obligations are raised as soon as the constructive obligation to incur such costs arises and the future decommissioning cost can be reliably estimated. Decommissioning costs are provided at the present value of expected costs to settle the obligation using estimated cash flows and are recognized as part of the cost of the asset.

The cash flows are discounted at a current pre-tax rate that reflects the risks specific to the decommissioning liability. The unwinding of the discount is expensed as incurred and recognized in the comprehensive income statement as a finance cost. The estimated future costs of decommissioning are reviewed annually and adjusted as appropriate. Changes in the estimated future costs or in the discount rate applied are added to or deducted from the cost of the asset. The amount deducted from the cost of the asset shall not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess shall be recognized immediately in profit or loss.

Provision for land restoration, representing the cost of restoring land damage after the commencement of commercial production, is estimated at net present value of the expenditures expected to settle the obligation. Change in provision and unwinding of discount on land restoration are recognized in the consolidated statements of comprehensive income. Ongoing rehabilitation costs are expensed when incurred.

3.19 Financial guarantee contracts

Management on annual basis assesses probability of risks that can be arising in relation of financial guarantee contracts through financial analysis of counterparties. If the risk is significant – financial guarantee contracts must be recognized as liabilities in notes to consolidated financial statements in accordance with IAS 37. Otherwise – if risk is insignificant – financial guarantee contracts liabilities must be disclosed as off-balance sheet liabilities.

4 Significant accounting judgments, estimates

The preparation of the Group's consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

In the process of applying the Group's accounting policies, management has made the following judgments, estimates and assumptions, which have the most significant effect on the amounts recognized in these consolidated financial statements:

(a) Fair value of financial instruments

Where the fair value of financial assets and financial liabilities recognized in the statements of financial position cannot be derived from active markets, they are determined using valuation techniques including the discounted cash flows model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the recognized fair value of financial instruments.

(b) Remaining useful life of property, plant and equipment

Management assesses the remaining useful life of property, plant and equipment in accordance with the current technical conditions of assets and estimated period when these assets bring economic benefit to the Group.

(c) Impairment of non-current assets

An impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The recoverable amount is most sensitive to the growth rate used for extrapolation purposes (coal price, sales volume) and to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

(d) Defined benefits plan obligations

For the purpose of estimation of defined benefit obligation, the projected unit credit method was used, which includes the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. In determining the appropriate discount rate, management considers the interest rates of high-quality government bonds with extrapolated maturities corresponding to the expected duration of the defined benefit obligation. Future salary increases and pension increases are based on expected future inflation rates.

(e) Environmental obligations

The Group's mining and processing activities are susceptible to various environmental laws and regulations changes. The Group estimates environmental obligations based on management's understanding of the current legal requirements, terms of the license agreements and internally generated estimates. Provision is made, based on net present values, for decommissioning and land restoration costs as soon as the obligation arises. Actual costs incurred in future periods could differ materially from the amounts provided. Additionally, future changes to environmental laws and regulations, life of mine estimates and discount rates could affect the carrying amount of this provision.

(f) Income taxes

The Group is subject to income taxes in numerous jurisdictions. Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. The differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective Group company's domicile.

Deferred tax assets are recognized for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. If actual results differ from these estimates or if these estimates must be adjusted in future periods, the financial position and results of operations may be negatively affected.

(g) Idle capacity expenses

Due to volatility of the coal market production capacity of the Group's individual Companies in some periods could be operated not according to its normal capacity of the production facilities. In the case of significant deviation of the actual capacity from the normal capacity, part of the fixed production overheads is reflected in item "Idle capacity expenses".

Management of the Group uses estimations and judgments to determine the following items: normal capacity of the individual companies, the period of the partial exploitation of the production capacity, amount of overheads that should be allocated.

5 Information on operational segments

The group defines the following business segments that include goods and services distinguished by the level of risk and terms of acquisition of income:

- mineral resource and processing industry — includes income from sale of own coal products and income from coal beneficiation;
- trade activity - includes income from sale of merchandises;
- other activity - includes income from rendering of other works and services.

Management controls the results of operating segments separately for the purpose of decision making about allocation of resources and performance measurement. The results of segments are estimated on profit/(loss) before tax.

Information about the segments of business for the **three months ended 30 September 2014:**

	Business segments			Assets and liabilities not included in segments	Total
	Mineral resource and processing industry	Trade activity	Other activity		
Revenue					
Sales to external customers	2,153	3,431	8	-	5,592
	2,153	3,431	8	-	5,592
(Loss)/profit before tax of the segment	(5,145)	1,047	(33)	-	(4,131)
Depreciation and amortization expenses	1,963	-	-	-	1,963
Defined benefits plan obligations expenses	399	-	-	-	399
Operational assets	149,974	3,196	89	3,881	157,140
Operational liabilities	(129,767)	(2,291)	(680)	(9,670)	(142,408)
Disclosure of other information					
Capital expenditure	91	-	-	-	91

As at 30 September 2014 assets of segments do not include financial assets (USD 2,569 thousand), cash (USD 501 thousand), other taxes receivable (USD 205 thousand), as well as deferred tax assets (USD 606 thousand), since management of these assets is carried out at the Group's level.

As at 30 September 2014 liabilities of segments do not include deferred tax liabilities (USD 2,561 thousand), other taxes payable (USD 3,558 thousand), income tax payables (USD 1,750 thousand), provision on tax liabilities (USD 1,801 thousand), since management of these liabilities is carried out at the Group's level.

Information about the segments of business for the **year three months ended 30 September 2013:**

	Business segments			Assets and liabilities not included in segments	Total
	Mineral resource and processing industry	Trade activity	Other activity		
Revenue					
Sales to external customers	22,367	6,529	120	-	29,016
	22,367	6,529	120	-	29,016
(Loss)/Profit before tax of the segment	(5,335)	243	47	-	(5,045)
Depreciation and amortization expenses	(3,126)	-	-	-	(3,126)
Defined benefits plan obligations expenses	(132)	-	-	-	(132)
Impairment of inventories	(109)	-	-	-	(109)
Operational assets	228,168	2,908	474	21,998	253,548
Operational liabilities	(144,654)	(209)	(199)	(9,421)	(154,483)
Disclosure of other information					
Capital expenditure	6,771	-	-	-	6,771

As at 30 September 2013 assets of segments do not include financial assets (USD 15,563 thousand), cash (USD 3,392 thousand), other taxes receivable (USD 2,158 thousand), as well as deferred tax assets (USD 885 thousand), since management of these assets is carried out at the Group's level.

As at 30 September 2013 liabilities of segments do not include deferred tax liabilities (USD 3,228 thousand), other taxes payable (USD 2,548 thousand), income tax payables (USD 1,172 thousand), provision on tax liabilities (USD 2,473 thousand), since management of these liabilities is carried out at the Group's level.

In 2009 CwAL LE Sh/U Chapaeva (current entity name - CwAL LE "Sh/U Blagoveshenskoe") negotiated the contract of lease of state property-integral property complex GC Shakhtoupravlinnia named after V.I. Chapaeva.

In 2010 CwAL LE Novodzerzhynskaya Mine (current entity name - CwAL LE "Mine St.Matrona Moskovskaya") negotiated the contract of lease of state property-integral property complex – integral property complex GC Novodzerzhynskaya Mine.

According to these contracts, the lessee receives state property for the period of 49 years (current entity name CwAL LE "Sh/U Blagoveshenskoe" - until 11 February 2058, CwAL LE "Mine St.Matrona Moskovskaya" - until 27 April 2059) on fee basis. Such property comprises premises, facilities, mine workings, production equipment, transport, assets under construction and special permissions for subsurface use. Also, as term of agreements, the lessee becomes legal success or of rights and liabilities of GC Shakhtoupravlinnia named after V. I. Chapaeva and GC Novodzerzhynskaya Mine. Additionally, the lessee undertakes current and capital maintenance of property, insurance and dismantling of mines in case of mine stock depletion. Under the agreement of lessor, lessee has a right to give property in to sublease and to transfer own rights and liabilities under this agreement to third parties.

There are fixed payments on this contract, but each consequent lease payment is determined by correction of previous month lease payment on current month inflation rate.

Amendments, addendums or cancellation of this contract are possible under agreement of both parties.

Net book value of leased assets:

	As at 30 September 2014	As at 30 June 2014	As at 30 September 2013

Current provisions			
Provision on tax liabilities	(723)	(721)	-
	(723)	(721)	-

The Group liabilities, connected with environmental restoration, notably decommission of property, plant and equipment and land restoration under waste dumps. Estimation of liability bases on estimated prices of decommissions of property, plant and equipment and land restoration under waste dumps procedures. Discount rate used by the Group is 18%.

Management recognized provision for the payment of potential tax liabilities. However, if the tax authorities classify such transactions as subject to taxation and apply such classification to the companies of the Group, actual taxes and penalties may differ from the Management assessment.

Expected timing of economic benefits outflows for provision on tax liabilities are in the period from February 2015 to April 2017.

Expected timing of economic benefits outflows for provision for land restoration and dismantling are postponed for long period.

29 Related party transactions

According to existing criteria of determination of related parties, the related parties of the Group are divided into the following categories:

- Entities - related parties under common control with the Companies of the Group;
- Entities - related parties, which have joint key management personnel with the Companies of the Group.

Ultimate controlling party is Mr. Vyshnevetsky V.

The sales of finished goods, merchandises and rendering of the services to related parties are made at terms equivalent to those that prevail in arm's length transactions on market price basis. Provision of loans and operations with notes are made at terms different from the independent parties transactions.

Transactions between related parties attributable to the second category are occasional and not significant, thus, they are not disclosed in these consolidated financial statements.

Details of transactions between entities - related parties under common control with the Companies of the Group are disclosed below:

Items of consolidated statements of comprehensive income

31 Contingent assets and liabilities

As at the date of presentation of the financial statements the Group is not involved in any legal processes that can have material impact on its financial position.

32 Off-balance sheet liabilities

Companies of the Group were engaged in indemnity contracts and guarantee contracts to secure liabilities of third parties. As at 30 September 2014 contracts of guarantee assuring liabilities LLC "Ugletechnic" amount to USD 6,178 thousands. As at 30 September 2014 loans and borrowings of CwAL LE "Shahta Putilovska" were pledged by the property, plant and equipment of Group (Eximenergo LLC) with carrying amount of USD 803 thousand.

33 Subsequent events

On the 8 October 2014 the USD loan obtained by CwAL LE "Sh/U Blagoveshenskoe" from Ukrainian Business Bank in amount of USD 19,819 thousand was settled in full at the expense of the deposit placed in same bank.

On the 1 September 2014 CwAL LE "Sh/U Blagoveshenskoe" signed cession agreement with Barryntello Investments LTD in respect of the existing loan agreement with Loricom Holding Group LTD in amount of USD 20,000 thousand. All other conditions of the loan agreement remained unchanged.

On the 20 November 2014 Donantracit LLC concluded factoring contract with OJSC "FUIB" with credit limit UAH 15,000 thousand. Annual interest rate 24%. Maturity date is on 2 April 2016.

33 Subsequent events (continued)

As of the date of publication of this report there are no precedents for early loan repayments (defaults) from any financing institutions. In case of continuing military confrontation in Donetsk and Lugansk regions, the Group is expecting to negotiate further postponement for interest and principals payments.

According to the management's opinion there were no events after the closing date, except for the disclosed above and known to the management which would substantially influence the financial standing of the Group.
