§ 4 Entry into force

This resolution shall enter into force as of the day of its adoption.

Substantiation of draft resolution No. 6:

The objective of the resolution is for the General Meeting to give its approval for the issuance of bonds in accordance with the requirements set forth by the Company's Articles of Association. The purpose of the Resolution is to obtain the General Meeting's approval for the Company to initiate the Bond Issue Program with an aggregate value of not more than PLN 1,000,000,000 in order to ensure that the Company has full access, during the period designated in the Resolution, to all forms of debt financing available on the market, including the corporate bonds market. The proposed bond issue provides the Company with access to new sources of financing and new instruments, should the Company decide to raise new financing, to the extent permitted by the terms of the existing financing and as necessary to satisfy the needs of the Company and the entities from its group. Due to the nature and dynamics of the process of placement of the bonds, the Management Board is of the opinion that asking the General Meeting to adopt a resolution on each proposed bonds issue would materially inhibit an effective implementation of such bonds issues on the terms that are most favorable for the Company and also meet the expectations of the prospective purchaser of these bonds. Therefore the proposes General Meeting resolution, while defining the key boundary conditions of the bond issue program, also authorizes the Management Board to determine and choose the details of each issue under the program that will be the most favorable for the Company. Pursuant to an authorization granted by the General Meeting, the Management Board will be empowered to set forth the terms and dates of bond issues, including the decision on the manner in which the bonds will be offered, the determination of the detailed terms of the issue and the entities to which the offer to purchase the bonds will be addressed, thus enabling the Company to adjust fully the terms of bonds to the investors' current expectations, as well as the market situation at the time of the issuance of the given series of bonds. Every time it passes a decision on the issuance of bonds within the framework of the program, the Management Board will be authorized to define the purpose of the issue of the given tranche of the bonds, in particular in the case of adopting a decision on using the

proceeds from the bonds issue for the financing of investment activities or other undertakings aimed at the implementation of the strategy of the Company's group and improving its competitive position.

§ 8

Entry into force

This resolution shall enter into force as of the day of its adoption.

Substantiation of draft Resolution No. 7:

The suggested Resolution is intended to streamline the process of obtaining funds to finance the Company’s operations through the issue of bonds via the reinstatement of the model provided for in the Commercial Companies Code according to which the Company’s Management Board is empowered to decide on the issue of ordinary bonds (as long as the Supervisory Board’s consent is obtained in the instances stipulated in the Company’s Articles of Association). In addition, the Resolution introduces the amendments to enable the Company to issue convertible bonds. The Commercial Companies Code or other acts do not require resolutions on the issue of bonds that are not convertible into shares or of senior bonds to be adopted by the General Meeting. The need to issue bonds may be associated with the need to finance current operations, including investment activities, and the implementation of the Company’s strategy and, therefore, may be of key importance to the further development of the Company. As a result of the proposed amendments to the Articles of Association, the Company will gain some flexibility with respect to the structure of its sources of funds with the Management Board capable to respond quickly to changing market conditions in connection with the issue of bonds.

The remaining amendments of the Company’s Articles of Association result from the development of scope of products addressed to the Company’s customers and customers of

other companies from the group or are of technical nature and are linked to the changes of the conduct of the Management Board or the rules of the Company's representation.
