This portfolio rationalisation activity means the Company now has investments in 11 assets, comprising eight pipeline plots, one operational shopping and entertainment centre, and two development projects. Two of these assets are in India and the remainder of the portfolio sits within Central and Eastern Europe.

The Company has been in discussions with potential purchasers in regard to several of its land plots. Looking ahead, we have more disposals agreed and further disposals identified. We remain committed to continuing the strong progress to date, delivering for our stakeholders.

Romania

Plaza holds a 75% interest in a joint venture with the Government of Romania to develop Casa Radio (Dambovita), which is the largest development opportunity in central Bucharest. A 467,000 sqm complex, including a 90,000 sqm GLA shopping mall, leisure centre, offices, a hotel and a convention and conference hall, is planned for the site. The Company has obtained a PUD (Detailed Urban Permit) and a PUZ (Zonal Urban Plan) for the Dambovita Centre Multifunctional Complex.

Following the global financial crisis and to ensure that the development process was more aligned with the current market conditions, the Company initiated preliminary discussions with the Authorities (which are shareholders in the SPV and a party to the Public Private Partnership) regarding the future of the project. The Company has also officially notified the Authorities that it will be seeking to redefine some of the terms in the existing PPP contract, including the timetable, structure and project milestones.

India

In 2008, Plaza formed a 50:50 joint venture with Elbit Imaging (the "JV") to develop large mixed-use projects in Bangalore, Chennai and Kochi. Under the terms of the agreement, Plaza acquired a 47.5% stake in Elbit Plaza India Real Estate Holdings Limited ("EPI"), which had existing stakes in mixed-use projects in India, in conjunction with local Indian partners.

The JV projects are as follows:

Bangalore - This residential project, owned by the JV, is located on the eastern side of Bangalore, India's fifth largest city with a population of more than eight million inhabitants.

In June 2017, Elbit Plaza India Real estate ("EPI") signed a revised agreement in relation to the sale of a 100% interest in a special purpose vehicle which holds a site in Bangalore, India to a local investor (the "Purchaser").

The Purchaser and EPI have agreed that the purchase price will be amended to INR 338 Crores (approximately Euro 47 million) instead of the INR 321 Crores (approximately Euro 44.6 million) agreed in the previous agreement. As part of the agreement, INR 110 Crores (approximately Euro 15.3 million) will be paid by the Purchaser in instalments until the Final Closing. The Final Closing will take place on September 1, 2018, when the final instalment of INR 228 Crores (approximately Euro 31.7 million) will be paid to EPI.

If the Purchaser defaults before the Final Closing, EPI is entitled to forfeit certain amounts paid by the Purchaser as stipulated in the revised agreement. All other existing securities granted to EPI under the previous agreement will remain in place until the Final Closing.

Chennai - A residential development, which is 100% owned by the JV and 20% by a prominent local developer. The Chennai Project was designated at the end of 2014 as a project for development. During 2015, due to changes in the Group's activities and objectives, the Company decided not to develop the Chennai project but rather to dispose of it in its current situation.

On 2 August 2016, the Chennai Project SPV signed a Joint Development Agreement with a local developer ("Developer" and "JDA", respectively) with respect to the Property.

Administrative expenses increased from €3.1 million in H1 2016 to €3.6 million, mainly as a result additional audit fee for re-auditing the 2016 consolidated financial statements.

Finance income slightly decreased to €0.4 million from €3.4 million in 2016. In 2016 €2.6 million of income derived from foreign exchange gains on the Company's bonds issued in Israeli New Shekels ("NIS") and the change in the Israeli Consumer Price Index while in 2017 it has decreased to €0.26 million.

Finance costs decreased from €13.3 million in H1 2016 to €11.1 million in H1 2017. The main components of the reduction in costs were:

- A strengthening of the NIS against the euro during H1-2017. The effect on the bonds totalled €4.4 million of expense (H1-2016 : income €2.7 million).
- Interest expenses booked on bonds totalled €5.4 million (H1-2016 : €6.8 million).

- In H1-2016 an additional €7.0 million was recorded as a non-cash expense, associated with amortisation of the discount on bonds (H1-2017: €0.4 million).
- In H1-2017, interest expenses on borrowings totalled €0.9 million (H1-2016 : €2.0 million of expenses).
- In H1-2016 €2.5 million of finance costs on bonds were capitalised following the recommencement of construction at the Belgrade Plaza (Serbia) site while in H1-2017 nil.

As a result, the loss for the period amounted to circa €6.8 million in H1 2017, representing a basic and diluted losses per share for the period of €0.99 (H1 2016: €0.89 loss).

Balance sheet and cash flow

The balance sheet as at 30 June 2017 showed total assets of €222 million compared to total assets of €322 million at the end of 2016, largely as a result of the implementation of the debt reduction strategy.

Consolidated cash position as at June 30, 2017 (including restricted bank deposits) decreased to €11 million (31 December 2016: €12.8 million) and current cash position of circa €32.5 million (€2.7 million restricted).

The value of the Company's trading properties decreased from €264 million as at 31 December 2016 to €164 million at the end of 30 June 2016 due to the disposal of Suwalki Plaza and Belgrade Plaza.

Investments in equity accounted investee companies has remained on the same level of €29 million (31 December 2016 €30 million).

Trade payables has decreased from €7.4 million to €0.7 million due the sale of Belgrade Plaza.

Total bank borrowings amounted to €43.6 million related to Torun Plaza (31 December 2016: €82.3 million) after the disposal of trading properties (Suwalki Plaza and Belgrade Plaza).

Aside from bank financing, Plaza has a balance sheet liability (including accrued interest) of €132 million (with an adjusted par value of circa €140 million) from issuing bonds on the Tel Aviv Stock Exchange and to Polish institutional investors. These bonds are presented at amortised cost under current liabilities.

Provision was created with respect to the obligation connected to Casa Radio project (Bucharest Romania) in the amount of €13.2 million same as in 2016.

Disclosure in accordance with Regulation 10(B)14 of the Israeli Securities Regulations (periodic and immediate reports), 5730-1970

1. General Background

According to the abovementioned regulation, upon existence of warning signs as defined in the regulation, the Company is obliged to attach to its report's projected cash flow for a period of two years, commencing with the date of approval of the reports ("Projected Cash Flow").

One of the warning signs emphasised is a matter included in the auditors' report – Disclaimer of opinion issued by the auditor. The Material uncertainty related to going concern was included in view of the management's plans for asset disposals and also in respect of material uncertainty related to Casa Radio project, as described in Notes 4, 5 of these unreviewed and unaudited condensed consolidated Financial Statements in this press release.

Upon having such warning signs, the Company is required to provide projected cash flow for the period of 24 months following the reporting period, and also provide explanations on differences between previously disclosed estimated projected cash flows with actual cash flows.

2. Projected cash flow

The Company has implemented the restructuring plan that was approved by the Dutch court on July 9, 2014 (the "Restructuring Plan"). Under the Restructuring Plan, principal payments under the bonds issued by the Company and originally due in the years 2013 to 2015 were deferred for a period of four and a half years, and principal payments originally due in 2016 and 2017 were deferred for a period of one year.

The Restructuring Plan further provided that, if the Company does not prepay an aggregate amount of at least NIS 434 million (EUR 107.3 million) on the principal of the bonds on or before December 1, 2016 (the "Early Prepayment"), the principal payments due under the Extended Repayment Schedule will be advanced by one year (the "Accelerated Repayment Schedule"). On November 29, 2016, the Company's bondholders approved a postponement of the Early Prepayment date by up to four months and the reduction of the total amount of the required Early Prepayments to at least NIS 382 million (EUR 94.5 million) (a reduction of 12% on the original amount). In addition, the Company agreed to pay to its bondholders, on March 31, 2018, a one-time consent fee (which is equal to 0.25% from the Company's outstanding debt under the bonds at that time). The consent Fee shall be paid to the Company's bondholders on a pro rata basis. During first three months 2017, the Company paid to its bondholders a total amount of NIS 199.2 million (EUR 51 million) as an early redemption. Upon such payments, the Company complied with the Early Prepayment Term (early redemption at the total sum of at least NIS 382,000,000) and thus obtained a deferral of one year for the remaining contractual obligations of the bonds.

The materialisation, occurrence consummation and execution of the events and transactions and of the Assumptions on which the projected cash flow is based, including with respect to the proceeds and timing thereof, although probable, are not certain and are subject to factors beyond the Company's control as well as to the consents and approvals of third parties and certain risks factors. Therefore, delays in the realisation of the Company's assets and investments or realisation at a lower price than expected by the Company, as well as any other deviation from the Company's Assumptions (such as additional expenses due to suspension of trading, delay in submitting the statutory reports etc.), could have an adverse effect on the Company's cash flow and the Company's ability to service its indebtedness in a timely manner.

- Potential irregularities with respect to certain contracts entered into by Company concerning the Casa Radio project in Romania, which the Company had previously reported to the Romanian authorities.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2: - BASIS OF PREPARATION (Cont.)

- An agency and commission contract signed in 2011 regarding the 2012 sale of property in the United States that was jointly owned by the Company and EI.
- The risk that the public authorities could seek to terminate the PPP agreement in connection with the Casa Radio project and/or relevant permits and/or could seek to impose delay penalties with respect to the project.
- Significant risks and uncertainties pertaining to the achievement of the Company's cash flow forecasts, which included the occurrence of events that were beyond the Company's sole control.
- The risk that the bond holders may demand the immediate repayment of the bonds due to the Company's breach of covenant in the debenture agreement.

Following the issue of the disclaimer the following steps have been taken by the Company:

- a special committee led by independent legal firm, namely, Gross, Kleinhendler, Hodak, Halevy, Greenberg & Co., was established and the committee also comprised the Chairman of the Audit Committee. The special committee's remit was to review all engagements of the Group, during the period commencing on July 2014 (the date upon which the debt restructuring was approved and a new board of the Company was appointed) and ending on 31 December 2016, with a face value in excess of EUR 500 thousand and any broker agreements with a face value of above EUR 50 thousand (the "**Special Committee**"). The Investigation Committee has recently finalized its work in this regard and submitted its findings and recommendations to the Company. The Company has accepted the Investigation Committee's recommendations and is working to implement such recommendations.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2:- BASIS OF PREPARATION (Cont.)

b. Restatement of 2016 financial statements:

Bonds issued by the Company include several covenants, some of which allow the bond holders to demand immediate repayment in certain circumstances. In particular, the bond holders may ask for immediate repayment where there has been a material deterioration in the Company's business as compared to its situation at the time of the 2014 restructuring plan and where there is substantial suspicion that the Company will be unable to repay the debentures on time. In addition, should the bondholders exercise their right to declare immediate repayment, there is a cross default trigger in the Company's bank loan agreements that would allow the banks to demand repayment of the loans made. As of December 31, 2016, there are significant risks and uncertainties pertaining to the achievement of the Company's cash flow forecasts, which include the occurrence of events, which are beyond the Company's sole control. The Company's financial statements as of September 30, 2016 includes an auditor's opinion with emphasis of matter to going concern uncertainty. As a result, there is a risk that the bonds holders could argue there exists a substantial suspicion with respect to the Company's ability to repay its obligations that entitles them to immediate repayment. Should this occur there is a risk that the banks with whom the Company has loans in place will also demand immediate repayment of the loans made to the Company. The Company would be unable to meet the demands of its bondholders and its banks. Accordingly, the Company has restated its 2016 annual financial statements in order to present the entire debentures outstanding amounting to EUR 178,370 thousand and interest-bearing loans in amount of EUR 82,275 thousand as current liabilities.

It should be noted that, irrespective of any restatement and or any reference to the phrases "re-audit", "audit", "restatement", "reviewed" of financial statements over the year 2016, the financial statements over the year 2016 that were published on June 12, 2017 and adopted by the Company's general meeting of shareholders on July, 31 2017, are the only official and valid financial statements over the year ended on 31 December 2016. These financial statements have not been amended. No other document should be relied upon.

- During the period, the Company has changed the presentation format of the statements of profit or loss. Under the new format “sale of trading properties (shopping centers and land plots)” is presented on a gross basis due to the Company’s business of selling the entirety of its trading properties. Prior to this change, only “sale of shopping centers” was presented on a gross basis. In addition, “rental income from such shopping centers” is presented as part of “other income” line item. The Company believes that the new presentation format better reflects its results of operations and is in line with the presentation format of the Company's parent company.

e. New standards prior to their adoption:

Amendments to IAS 7 Statement of Cash Flows: Disclosure Initiative

The amendments require entities to provide disclosures about changes in their liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses). On initial application of the amendment, entities are not required to provide comparative information for preceding periods. The Group is not required to provide additional disclosures in its condensed interim consolidated financial statements, but will disclose additional information in its annual consolidated financial statements for the year ended 31 December 2017.

Amendments to IAS 12 Income Taxes: Recognition of Deferred Tax Assets for Unrecognised Losses

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.

Entities are required to apply the amendments retrospectively. However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognized in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Entities applying this relief must disclose that fact.

The Company is yet to evaluate the effect of IAS 12 on the consolidated financial statements

IFRIC 23, Uncertainty over Income Tax Treatments:

In June 2017, the International Accounting Standards Board issued IFRIC 23, Uncertainty over Income Tax Treatments. IFRIC 23 is to be applied while performing the determination of taxable profit (or loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under IAS 12. According to IFRIC 23, companies need to determine the probability of the relevant tax authority accepting each tax treatment, or group of tax treatments, that the companies have used or plan to use in their income tax filing which has to be considered to compute the most likely amount or the expected value of the tax treatment when determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates.

The standard permits two possible methods of transition:

- Full retrospective approach – Under this approach, IFRIC 23 will be applied retrospectively to each prior reporting period presented in accordance with IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors
- Retrospectively with cumulative effect of initially applying IFRIC 23 recognized by adjusting equity on initial application, without adjusting comparatives

The effective date for adoption of IFRIC 23 is annual periods beginning on or after January 1, 2019, though early adoption is permitted.

The Company is yet to evaluate the effect of IFRIC 23 on the consolidated financial statements.

NOTE 3: - USE OF JUDGEMENT AND ESTIMATES

In preparing this condensed consolidated interim financial information, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing this condensed consolidated interim financial information, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were principally the same as those that applied to the consolidated financial statements as at and for the year ended December 31, 2016, save for the changes highlighted above. Refer also to note 4 below for significant estimations performed.

NOTE 4: - GOING CONCERN AND LIQUIDITY POSITION OF THE COMPANY

The condensed consolidated interim financial data have been prepared on a going concern basis, which assumes that the Group will be able to meet the mandatory repayment terms of banking facilities and its debentures.

The Group's primary need for liquidity is to repay its debt, fund working capital requirements of the operating shopping centers, develop new shopping centers and fund general corporate purposes. The Group has incurred losses and experienced negative operating cash flows for the past several years, and accordingly, it has taken a number of actions to continue to support its operations and meet its obligations.

As at June 30, 2017 the Group's outstanding obligations to bondholders and banks are EUR 132.6 million and EUR 43.6 million, respectively.

In November 2016, the Group agreed with its bondholders to amend the terms of the early repayment requirement under the original debt restructuring plan (the "Restructuring Plan"). On March 15, 2017, the Group repaid the required minimum early repayment to its bondholders and thus obtained a deferral of one year for the remaining contractual obligations of the debentures.

Information concerning the Group's obligations and commitments to make future payments under contracts such as debt agreements in the 18 months starting July 1, 2017 is aggregated in the following tables.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NOTE 4: - GOING CONCERN AND LIQUIDITY POSITION OF THE COMPANY (Cont.)

<u>Contractual Obligations</u>	Total Payment Due by period (in TEUR)	
	<u>Within 1 year</u>	<u>1-1.5 years</u>
Debentures including current portion and interest	56,800	26,300
Secured bank loan (Torun)	43,596	-
Total contractual obligation (excluding working capital)	100,396	26,300
General & administrative	3,800	1,100

The Company expects to increase the amount of its liquid balances during the 18 months starting July 1, 2017, by means of the following actions:

- Sale of shopping center (including price adjustment of sold centers) in amount of EUR 44.7 million
- Sale of plots of lands in amount of EUR 43.4 million
- NOI and other income EUR 3.3 million

Management expects that the Group will be able to meet the remaining contractual obligations during the 18 months period starting July 1, 2017 by a combination of its assets disposal program and cash generated from operating shopping center.

Management acknowledges that the above expected cash flows are based on forward-looking plans and estimations which rely on the information known to management at the time of the approval of these financial statements. The materialization of the above forecast is uncertain and is subject to factors beyond the Company's control. Therefore, delays in the realization of the Group's assets and investments or realization at lower price than expected by management, could have an adverse effect on the Group's liquidity position and its ability to meet its contractual obligations on a timely manner.

Management further acknowledges that the Company is exposed to foreign currency risk derived from borrowings denominated in currency other than the functional currency of the Group, more specifically, a further devaluation of the EUR against the NIS can significantly increase the remaining contractual obligation to bondholders.

At the end of the reporting period the Company is in compliance with financial covenants required under the Restructuring Plan. However, as of the date of the approval of these consolidated financial data, the Company is near the minimum ratio required in respect to the "Coverage Ratio Covenant" as defined in the Restructuring Plan.

Notwithstanding this, the bond trust deeds give the bondholders the right to demand the immediate repayment of bonds where there is a material deterioration in the Company's business and substantial suspicion exists that the Company will be unable to repay the bonds on time.

The Company did not publish its financial statements within the deadline set out in the bond trust deeds and has not remedied the situation within the allowed time. This entitles the bondholders to declare that all or a part of their respective (remaining) claims become immediately due and payable.

Trading of the Company's ordinary shares, Series A Notes and Series B Notes were in 2017 also for a period temporarily suspended from trading on the relevant exchanges. This may entitle the bondholders to declare that all or a part of their respective (remaining) claims become immediately due and payable.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NOTE 4: - GOING CONCERN AND LIQUIDITY POSITION OF THE COMPANY (Cont.)

Under the Dutch Civil Code, being mandatory law of the Company's home state, the Company shall publish its stand-alone and consolidated financial statements within four months from the end of the book year. The Company did not comply with this requirement and published the financial statements over the year ended on 31 December 2016, on 12 June 2017 and its ordinary shares were suspended from trading, with effect from 2 May 2017, on the London Stock Exchange's main market for listed securities until 18 May 2017. As a result of the aforementioned suspension, Plaza's ordinary shares were suspended from trading on the Warsaw Stock Exchange and Plaza's ordinary shares and its Series A Notes and Series B Notes were suspended from trading on the Tel Aviv Stock Exchange. On May 18, 2017 the Company announced that, with effect from 10.30 a.m. (London time), its ordinary shares were restored to trading on the London Stock Exchange's main market for listed securities and to listing on the Official List of the Financial Conduct Authority. Plaza's ordinary shares and its Series A Notes and Series B Notes were also restored to trading on the Tel Aviv Stock Exchange. On May 19, the ordinary shares were restored to trading on the Warsaw Stock Exchange. As a result, the bondholders may be entitled to declare that all or a part of their respective (remaining) claims become immediately due and payable.

In addition, based on the bond trust deeds, the bondholders have a right to demand immediate repayment of bonds where there has been a material deterioration in the Company's business and substantial suspicion exists that the Company will be unable to repay the bonds on time. Should the bondholders exercise their right to declare immediate repayment, there is a cross default trigger in the Company's bank loan agreements that would allow the banks to demand repayment of the loans made. Accordingly, the Company has presented the entire amount owing and outstanding under the debentures, being EUR 132,450 thousand, and its interest-bearing loans from banks, being EUR 43,596 thousand, as current liabilities. As of June 30, 2017, there are significant risks and uncertainties pertaining to the achievement of the Company's cash flow forecasts, which include the occurrence of events which are beyond the Company's sole control.

The Company's financial statements as of December 31, 2016 includes an auditor's opinion with disclaimer of opinion. Accordingly, as referred to above bondholders have the right to demand immediate repayment of amounts outstanding to them and if they do this the banks from whom the Company has loaned monies have the right to demand immediate repayment. Should this occur, the Company would be unable to settle those claims and would need to enter to an additional debt restructuring or it might cease to be a going concern. As at the date of these statements the immediate repayment provisions have not been triggered by bondholders. However, the Company has received correspondence from the trustee of the Israeli Series A bondholders, requesting that the Company make any future bondholder repayments on a pro-rata basis (as per the share of each Series in the outstanding debt rather than as per the ratios agreed in the restructuring plan). See also Note 8(d).

A combination of the abovementioned conditions indicates the existence of a material uncertainty that casts significant doubt about the Company's ability to continue as a going concern.

NOTE 6: - FINANCIAL INSTRUMENTS

a. Carrying amounts and fair values

In respect to the Company's financial instruments assets not presented at fair value, being mostly short-term market interest bearing liquid balances, the Company believes that the carrying amount approximates its fair value. In respect of the Company's financial instruments liabilities:

Fair value of the quoted debentures is based on price quotations at the reporting date and is classified as Level 1 in the fair value hierarchy.

	Carrying amount		Fair value	
	June 30, 2017	December 31, 2016	June 30, 2017	December 31, 2016

The total contractual liability of the Debentures was EUR 140.2 million as at June 30, 2017. In respect of most of other non-listed borrowings, as most financing facilities are backed by real estate assets, and they bear floating interest rate, the Company has a basis to believe that the fair value of non-listed borrowings approximates the carrying amount.

b. Fair value hierarchy

The table below analyses fair value measurements as at June 30, 2017 for financial assets and financial liabilities. These fair value measurements are categorized into different levels in the fair value hierarchy based on the inputs to valuation techniques used. The different levels are defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: unobservable inputs for the asset or liability
