MOL remains a leader in sustainability in Central Europe and was selected as a component of the Dow Jones Sustainability Indices for the fourth year in a row

MOL Plc. ("MOL") hereby notifies the market of the following:

MOL has again been selected as an index component of the Dow Jones Sustainability Indices (DJSI) during the 2019 indices review process. This is the fourth year running that MOL was recognized for its corporate sustainability leadership and made it to the DJSI index. Following the annual sustainability assessment, MOL materially improved its scores compared to the previous years and is now ranked in the top 10% of Upstream & Integrated Oil & Gas companies worldwide based on sustainability performance. MOL remains one of the leaders in sustainability in Central Europe and is the sole Emerging European member of the index.

The DJSI has been designed to identify companies that demonstrate strong Environmental, Social and Governance (ESG) practices against internationally recognized standards. The DJSI is based on a rigorous analysis of a company's sustainability performance, hence membership in the DJSI is restricted to corporations judged to be best-in-class. Given its long-term commitment to sustainable development, MOL is pleased to be continuously recognized as a top ESG performer among the investment community.
