In addition, new modernisation projects taken in the companies in 2021 were also discussed.

The Supervisory Board analysed, among others, the following projects:

- Grain (started at CIECH Soda Deutschland GmbH & Co. KG in Germany and continued at CIECH Salz Deutschland GmbH).

The project aims to develop the salt segment of the CIECH Group, understood as increasing the production capacity and sales of salt products by building and commissioning new production capacities with a target capacity of 450 thousand tonnes/year. The production is dedicated to the segment of salt products such as: salt tablets, electrolysis salt, pharmaceutical grade salt, kitchen salt and granulated salt.

The commissioning of the new evaporated salt plant in Staßfurt was successfully completed, however, the achievement of the salt plant's target production capacity, as well as the launch of a full range of salt products, has gradually taken place since the third quarter of 2021.

- Golden Eye project (implemented at CIECH Soda Deutschland GmbH & Co. KG in Germany).

The project aims to increase the production capacity of sodium bicarbonate with a focus on the production of a high-margin dialysis-quality sodium bicarbonate product. The project is divided into 2 phases - 1) construction of a drying room to enable the production of dialysis grade soda and 2) construction of a new DCB column and crystalliser to increase the efficiency of the system and obtain the highest quality product.

The project aimed to develop an innovative product containing 50% less glyphosate compared to conventional market preparations, while ensuring its comparable effectiveness in weed control. Globally, glyphosate is the largest molecule in terms of sales value of all plant protection products.

In 2021, the innovative product "Halvetic" appeared on the market, containing 50% less glyphosate, as effective in combating weeds as the preparations used so far, and above all, less harmful to people and the environment.

- Modernisation of the TG-1 turbine and heat recovery boiler (project implemented at CIECH Energy Deutschland GmbH).

The project consists in converting the turbine and boiler in terms of their adaptation to the possibility of using a different fuel, i.e. to switch from the "A-Gas" to the "H-Gas" fuel and the simultaneous regeneration and replacement of some of the modernised devices. The investment is being implemented due to the depletion of the local "A-Gaz" field and in order to maintain the current steam and electricity production capacity by CIECH Energy Deutschland.

- Modernisation of the furnace for the production of glassy sodium silicate at the Żary Plant (project implemented at CIECH Vitrosilicon S.A.).
A furnace modernisation project involving structural changes to the furnace in order to improve its energy efficiency and ensure production continuity in the long term.
- Construction of a gas and steam unit (project implemented at the CIECH Soda Polska S.A. Production Plant in Inowrocław)
The investment is implemented as part of the energy strategy of the CIECH Group, consisting in the construction of a gas turbine with an electric capacity of approx. 16 MW and a heat recovery boiler with a capacity of approx. 32 t/h of steam in Inowrocław. 7. ASSESSMENT OF THE SITUATION OF CIECH S.A. IN 2021 BY THE SUPERVISORY BOARD OF CIECH S.A., TAKING INTO ACCOUNT THE INTERNAL CONTROL SYSTEM AND THE SYSTEM FOR THE MANAGEMENT OF RISKS SIGNIFICANT TO THE COMPANY

The Supervisory Board of CIECH S.A. submits to the Annual General Meeting of CIECH S.A. a concise evaluation of the Company's situation in 2021, including the assessment of the internal control system and the system for the management of risks significant to the company.

1. EVALUATION OF THE SITUATION OF THE COMPANY IN 2021¹

In 2021, CIECH S.A. generated revenues of PLN 1,963.6 million (PLN 1,946.0 million in 2020), operating result of PLN -37.6 million (PLN 64.1 million in 2020) and net profit from continued and discontinued operations of PLN 133.2 million (PLN 155.3 million in 2020), the balance sheet total was PLN 4,612.6 million (PLN 4,357.6 million at the end of 2020) and cash increased by PLN 202.2 million, to the level of PLN 467.5 million.

The operating result was influenced by the growing price pressure on the market of key energy resources (coal, gas, electricity), fuel (coke, anthracite) and CO₂ emission allowances. The negative impact of growing variable costs was partially offset by the increase in contract prices in the fourth quarter of 2021, allowing the margin to be maintained. The creation of a provision for a long-term incentive programme in 2021 also had a significant impact on the result.

In 2021, sales revenues of CIECH S.A. amounted to 1,618.7 million and were lower (by 2%) compared to 2020. Mainly due to lower sales of raw materials for the production of plant protection chemicals, plastics and PUR foams, caused by a change in the business model, i.e. no intermediation in the process of purchasing raw materials for the AGRO and Foams segments.

In 2021, the gross profit on sales amounted to PLN 189.1 million, and in the same period of the previous year, PLN 244.2 million. The operating profit (EBIT) for 2021 was at the level of PLN -37.6 million and PLN 64.1 million for the comparative period, which gave the EBIT profitability for 2021 at the level of -2.3% (in the previous year -3.9%). Adjusted EBITDA on continued and discontinued operations amounted to PLN -28.7 million for 2021 and PLN 84.3 million for 2020, with the resulting adjusted EBITDA profitability at the level of -1.8% for 2021 and 5.1% for 2020, respectively.

The net profit on continued and discontinued operations amounted to PLN 133.2 million (PLN 155.3 million in 2020). The change is related to a lower operating result (PLN -101.7 million). This decrease was partially offset by the profit on the sale of CIECH Żywiec (PLN 41.7 million) and a lower input tax (PLN -37.2 million)

As at 31 December 2021, equity amounted to PLN 1,614.6 million (PLN 1,593.8 million at the end of 2020). Liabilities (long and short-term in total) of CIECH S.A. as at 31 December 2021, amounted to PLN 2,998 million, which means an increase in liabilities by PLN 234.1 million compared to the previous

¹ The presented information includes financial figures for continued and discontinued operations.

year's level. This increase resulted mainly from changes in the balance of trade and other liabilities by PLN 130.2 million and changes in the balance of other long-term liabilities by PLN 99.9 million.

Net debt of CIECH S.A., calculated as the total of long-term and short-term liabilities under loans, borrowings and other debt instruments, less cash and cash equivalents, amounted to PLN 1,783.7 million as at 31.12.2021, which means a decrease compared to the end of December 2020 by PLN 189.6 million.

Cash flows from operating activities in 2021 amounted to PLN 39.1 million and were PLN 27.2 million lower than the cash flows from this activity generated in 2020. The negative impact on the change in the value of cash flows was mainly due to a lower result on operating activities (PLN -101.7 million), a lower change in the balance of trade and other receivables (-PLN 98.5 million) and lower receiving inventory (PLN -23.1 million). The negative impact of the aforementioned factors was partially offset by a higher change in short-term liabilities (PLN 197.7 million).

In 2021, cash flows from investing activities amounted to PLN 289.4 million and were PLN 592.5 million higher than in the previous year. The greatest impact on the change in cash flows from investing activities was the balance of intercompany loans repayments/disbursements (a change by PLN 450.7 million) and proceeds from the sale of CIECH Żywiec.

In 2021, cash flows from financial activities amounted to PLN -126.5 million and were PLN 454.3 million lower than in the previous year..

The greatest impact on the decrease in cash flows from investing activities was the balance of inflows/repayments on loans and borrowings (a change by PLN -281.3 million) and the payment of dividends (PLN -158.1 million).

2. ASSESSMENT OF THE EFFECTIVENESS OF THE INTERNAL CONTROL SYSTEM

Within the CIECH Group, the internal control system consists of:

- institutional control - carried out by the Internal Audit Department of CIECH S.A.,
- operational and functional control carried out on a continuous basis by employees of all organisational units, by observing procedures, rules and regulations and other internal regulations in all phases of activity in the form of initial, ongoing and follow-up control.

In 2021, the Internal Audit Department of CIECH S.A., acting on the basis of the Organisational Regulations of CIECH S.A., carried out a series of inspections and audits on the basis of the approved Audit Plan, both at CIECH S.A. and at CIECH Group companies. The Department also carried out ad hoc audits at the request of the Management Board and Supervisory Board of CIECH S.A.

Audit and inspection reports, together with conclusions, are presented on an ongoing basis to the Management Board of CIECH S.A. and relevant organisational units, and their implementation is monitored.

It needs continuous improvement and adaptation due to the changing environment and business requirements. This is done, among others, through periodic audits and controls of areas identified as most prone to various types of irregularities.

3. ASSESSMENT OF THE SYSTEM FOR THE MANAGEMENT OF RISKS SIGNIFICANT FOR THE COMPANY

The CIECH Group maintains a formal Risk Management System, implemented in 2020. The system defines the scope, activities, participants and responsibilities for risk management within the CIECH Group. It is an organised set of general principles and guidelines in the form of the risk management strategy, policy and procedure in the CIECH Group. The system was implemented to enable the CIECH Group to achieve its strategic goals without excessive risk taking. For this reason, the system:

- identifies threats to the achievement of the objectives of the CIECH Group,
- defines proposed measures to minimise threats and their impact on the goals set by the Group,
- in the case of previously unidentified risks, it allows for their proper recognition and estimation.

The system is continuously developed and constitutes a comprehensive and corporate solution. It is an important element of supporting the Group's current operations.

The Supervisory Board of CIECH S.A. uses it in monitoring the effectiveness of internal control and internal audit systems.

Only such a comprehensive approach and understanding of risks enables effective and efficient risk management and tangible benefits for the Group.

In terms of responsibility for the risk management process, a special role in the process is played by its key participants, namely the Management Board of CIECH S.A., the Executive Committee, the executives and the Director of the Risk Department.

The correctness and effectiveness of the implemented risk management system is monitored by the Supervisory Board and the Audit Committee, among others, on the basis of information from the Management Board of CIECH S.A. on current risks and methods of their management.

The risk management process within the CIECH Group was defined and implemented in accordance with the “International Standard ISO 31000: 2018 Risk Management”.

The goal of the CIECH Group is to ensure that it is perceived by its stakeholders as a transparent organisation with high awareness and understanding of the risks that may affect the achievement of its objectives.
